

# DIN EN ISO 13678:2009-12 (E)

Petroleum and natural gas industries - Evaluation and testing of thread compounds for use with casing, tubing, line pipe and drill stem elements (ISO 13678:2009); English version EN ISO 13678:2009

---

Inhalt	Seite
Foreword .....	3
Introduction.....	4
1 Scope .....	5
2 Conformance .....	5
2.1 Dual citing of normative references .....	5
2.2 Units of measurement.....	5
3 Normative references .....	6
4 Terms and definitions .....	6
5 Thread compound characteristics.....	8
5.1 Product characteristics.....	8
5.2 Physical and chemical characteristics.....	8
6 Thread compound performance properties .....	12
6.1 Small-scale test .....	12
6.2 Frictional properties .....	12
6.3 Extreme surface-contact pressure (gall resistance) properties for casing, tubing and line pipe .....	13
6.4 Fluid sealing properties for casing, tubing and line pipe .....	14
7 Quality assurance and control.....	14
8 Marking requirements .....	15
8.1 Marking.....	15
8.2 Labelling.....	15
Annex A (informative) API modified thread compound .....	16
Annex B (normative) Casing, tubing and line pipe reference standard formulation .....	20
Annex C (normative) Penetration test .....	22
Annex D (normative) Evaporation test .....	23
Annex E (normative) Oil separation test .....	24
Annex F (normative) Application/adherence test.....	25
Annex G (normative) Gas evolution test .....	26
Annex H (normative) Water leaching test.....	30
Annex I (informative) Frictional properties test .....	33
Annex J (informative) Extreme surface-contact pressure (galling) test for casing, tubing and line pipe .....	43
Annex K (informative) Fluid sealing test for casing, tubing and line pipe .....	44
Annex L (informative) Corrosion inhibition tests .....	47
Annex M (informative) Compound high-temperature stability test .....	48
Bibliography.....	49
