

DIN EN ISO 19901-3:2011-04 (E)

Petroleum and natural gas industries - Specific requirements for offshore structures - Part 3: Toppers structure (ISO 19901-3:2010); English version EN ISO 19901-3:2010, only on CD-ROM

| Inhalt | Seite |
|---|-------|
| Foreword | 5 |
| Introduction..... | 7 |
| 1 Scope | 8 |
| 2 Normative references | 9 |
| 3 Terms and definitions | 10 |
| 4 Symbols and abbreviated terms | 14 |
| 4.1 Symbols..... | 14 |
| 4.2 Abbreviated terms | 15 |
| 5 Overall considerations..... | 16 |
| 5.1 Design situations..... | 16 |
| 5.2 Codes and standards | 16 |
| 5.3 Deck elevation and green water..... | 17 |
| 5.4 Exposure level | 17 |
| 5.5 Operational considerations | 18 |
| 5.6 Selecting the design environmental conditions | 18 |
| 5.7 Assessment of existing topsides structures..... | 18 |
| 5.8 Reuse of topsides structure | 18 |
| 5.9 Modifications and refurbishment..... | 18 |
| 6 Design requirements..... | 18 |
| 6.1 General | 18 |
| 6.2 Materials selection | 19 |
| 6.3 Design conditions | 19 |
| 6.4 Structural interfaces..... | 19 |
| 6.5 Design for serviceability limit states (SLS) | 19 |
| 6.6 Design for ultimate limit states (ULS) | 21 |
| 6.7 Design for fatigue limit states (FLS)..... | 22 |
| 6.8 Design for accidental limit states (ALS)..... | 22 |
| 6.9 Robustness | 22 |
| 6.10 Corrosion control | 23 |
| 6.11 Design for fabrication and inspection..... | 23 |
| 6.12 Design considerations for structural integrity management..... | 24 |
| 6.13 Design for decommissioning, removal and disposal | 24 |
| 7 Actions | 24 |
| 7.1 General | 24 |
| 7.2 In-place actions | 25 |
| 7.3 Action factors | 26 |
| 7.4 Vortex-induced vibrations | 28 |
| 7.5 Deformations | 28 |
| 7.6 Wave and current actions..... | 28 |
| 7.7 Wind actions | 29 |
| 7.8 Seismic actions | 29 |
| 7.9 Actions during fabrication and installation | 30 |
| 7.10 Accidental situations | 30 |
| 7.11 Other actions | 40 |
| 8 Strength and resistance of structural components..... | 42 |

| | | |
|---------|--|----|
| 8.1 | Use of local building standards | 42 |
| 8.2 | Cylindrical tubular member design..... | 42 |
| 8.3 | Design of non-cylindrical sections | 43 |
| 8.4 | Connections | 43 |
| 8.5 | Castings..... | 44 |
| 9 | Structural systems..... | 45 |
| 9.1 | Topsides design..... | 45 |
| 9.2 | Topsides structure design models | 45 |
| 9.3 | Support structure interface | 46 |
| 9.4 | Flare towers, booms, vents and similar structures..... | 46 |
| 9.5 | Helicopter landing facilities (helidecks) | 47 |
| 9.6 | Crane support structure..... | 50 |
| 9.7 | Derrick design | 53 |
| 9.8 | Bridges..... | 53 |
| 9.9 | Bridge bearings..... | 53 |
| 9.10 | Anti-vibration mountings for modules and major equipment skids | 54 |
| 9.11 | System interface assumptions..... | 54 |
| 9.12 | Fire protection systems | 54 |
| 9.13 | Penetrations | 55 |
| 9.14 | Difficult-to-inspect areas..... | 55 |
| 9.15 | Drainage..... | 55 |
| 9.16 | Actions due to drilling operations | 55 |
| 9.17 | Strength reduction due to heat | 55 |
| 9.18 | Walkways, laydown areas and equipment maintenance..... | 55 |
| 9.19 | Muster areas and lifeboat stations..... | 56 |
| 10 | Materials | 56 |
| 10.1 | General..... | 56 |
| 10.2 | Carbon steel | 57 |
| 10.3 | Stainless steel | 59 |
| 10.4 | Aluminium alloys | 59 |
| 10.5 | Fibre-reinforced composites | 60 |
| 10.6 | Timber | 61 |
| 11 | Fabrication, quality control, quality assurance and documentation..... | 61 |
| 11.1 | Assembly | 61 |
| 11.2 | Welding | 62 |
| 11.3 | Fabrication inspection | 62 |
| 11.4 | Quality control, quality assurance and documentation | 62 |
| 11.5 | Corrosion protection | 62 |
| 12 | Corrosion control..... | 63 |
| 12.1 | General..... | 63 |
| 12.2 | Forms of corrosion, associated corrosion rates and corrosion damage | 63 |
| 12.3 | Design of corrosion control..... | 63 |
| 12.4 | Fabrication and installation of corrosion control..... | 64 |
| 12.5 | In-service inspection, monitoring and maintenance of corrosion control | 65 |
| 13 | Loadout, transportation and installation..... | 65 |
| 14 | In-service inspection and structural integrity management | 66 |
| 14.1 | General..... | 66 |
| 14.2 | Particular considerations applying to topsides structures..... | 66 |
| 14.3 | Topsides structure default inspection scopes | 66 |
| 15 | Assessment of existing topsides structures | 68 |
| 16 | Reuse of topsides structure | 68 |
| Annex A | (informative) Additional information and guidance | 69 |
| A.1 | Scope | 69 |
| A.2 | Normative references | 69 |
| A.3 | Terms and definitions | 69 |
| A.4 | Symbols and abbreviated terms | 69 |
| A.5 | Overall considerations | 69 |

| | | |
|---------------------|---|------------|
| A.6 | Design requirements | 70 |
| A.7 | Actions | 74 |
| A.8 | Strength and resistance of structural components | 100 |
| A.9 | Structural systems | 102 |
| A.10 | Materials | 107 |
| A.11 | Fabrication, quality control, quality assurance and documentation | 109 |
| A.12 | Corrosion control | 110 |
| A.13 | Loadout, transportation and installation | 110 |
| A.14 | In-service inspection and structural integrity management | 111 |
| A.15 | Assessment of existing topsides structures | 112 |
| A.16 | Reuse of topsides structure | 112 |
| Annex B | (informative) Example calculation of building code correspondence factor | 113 |
| B.1 | General | 113 |
| B.2 | Basic data | 113 |
| B.3 | Design and utilizations to ISO 19902 | 114 |
| B.4 | Design and utilizations to ANSI/AISC 360-05^[2] | 116 |
| Annex C | (informative) Regional information | 119 |
| Bibliography | | 120 |
