## Petroleum, petrochemical and natural gas industries - Reliability modelling and calculation of safety systems

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
<b>1</b>	<b>Scope .....</b>	<b>1</b>
<b>2</b>	<b>Analysis framework .....</b>	<b>2</b>
2.1	Users of this Technical Report .....	2
2.3	Overview of the reliability modelling and calculation approaches considered in this Technical Report .....	4
2.4	Safety systems and safety functions .....	7
<b>3</b>	<b>Terms and definitions .....</b>	<b>8</b>
3.1	Basic reliability concepts .....	8
3.2	Failure classification .....	20
3.3	Safety systems typology .....	24
3.4	Maintenance issues .....	25
3.5	Other terms .....	28
3.6	Equipment-related terms .....	29
<b>4</b>	<b>Symbols and abbreviated terms .....</b>	<b>30</b>
<b>5</b>	<b>Overview and challenges .....</b>	<b>33</b>
5.1	General considerations about modelling and calculation challenges .....	33
5.2	Deterministic versus probabilistic approaches .....	35
5.3	Safe failure and design philosophy .....	35
5.4	Dependent failures .....	36
5.5	Human factors .....	37
5.6	Documentation of underlying assumptions .....	40
<b>6</b>	<b>Introduction to modelling and calculations .....</b>	<b>41</b>
6.1	Generalities about safety systems operating in "on demand" or "continuous" modes .....	41
6.2	Analytical approaches .....	44
<b>7</b>	<b>Analytical formulae approach (low demand mode) .....</b>	<b>47</b>
7.1	Introduction .....	47
7.2	Underlying hypothesis and main assumptions .....	47
7.3	Single failure analysis .....	48
7.4	Double failure analysis .....	50
7.5	Triple failure analysis .....	55
7.6	Common cause failures .....	56
7.7	Example of implementation of analytical formulae: the PDS method .....	57
7.8	Conclusion about analytical formulae approach .....	57
<b>8</b>	<b>Boolean and sequential approaches .....</b>	<b>58</b>
8.1	Introduction .....	58
8.2	Reliability block diagrams (RBD) .....	58
8.3	Fault Tree Analysis (FTA) .....	59
8.4	Sequence modelling: cause consequence diagrams, event tree analysis, LOPA .....	61
8.5	Calculations with Boolean models .....	61
8.6	Conclusion about the Boolean approach .....	64

9	Markovian approach .....	65
9.1	Introduction and principles .....	65
9.2	Multiphase Markov models .....	68
9.3	Conclusion about the Markovian approach .....	69
10	Petri net approach .....	69
10.1	Basic principle .....	69
10.2	RBD driven Petri net modelling .....	71
10.3	Conclusion about Petri net approach .....	74
11	Monte Carlo simulation approach .....	74
12	Numerical reliability data uncertainty handling .....	74
13	Reliability data considerations .....	75
13.1	Introduction .....	75
13.2	Reliability data sources .....	76
13.3	Required reliability data .....	78
13.4	Reliability data collection .....	80
14	Typical applications .....	80
14.1	Introduction .....	80
14.2	Typical application TA1: single channel .....	82
14.3	Typical application TA2: dual channel .....	97
14.4	Typical application TA3: popular redundant architecture .....	110
14.5	Typical application TA4: multiple safety system .....	119
14.6	Typical application TA5: emergency depressurization system (EDP) .....	124
14.7	Conclusion about typical applications .....	135
	Annex A (informative) Systems with safety functions .....	136
	Annex B (informative) State analysis and failure classification .....	146
	Annex C (informative) Relationship between failure rate, conditional and unconditional failure intensities and failure frequency .....	152
	Annex D (informative) Broad models for demand mode (reactive) safety systems .....	160
	Annex E (informative) Continuous mode (preventive) safety systems .....	167
	Annex F (informative) Multi-layers safety systems/multiple safety systems .....	170
	Annex G (informative) Common cause failures .....	173
	Annex H (informative) The human factor .....	180
	Annex I (informative) Analytical formulae .....	186
	Annex J (informative) Sequential modelling .....	207
	Annex K (informative) Overview of calculations with Boolean models .....	213
	Annex L (informative) Markovian approach .....	221
	Annex M (informative) Petri net modelling .....	239
	Annex N (informative) Monte Carlo simulation approach .....	248
	Annex O (informative) Numerical uncertainties handling .....	252
	Bibliography .....	255
