|---------------------|--|-------------|
| <b>Foreword</b>     |  | <b>v</b>    |
| <b>Introduction</b> |  | <b>vii</b>  |
| <b>1</b>            | <b>Scope</b>   | <b>1</b>    |
| <b>2</b>            | <b>Normative references</b>                                    | <b>2</b>    |
| <b>3</b>            | <b>Terms and definitions</b>                                   | <b>2</b>    |
| <b>4</b>            | <b>Symbols and abbreviated terms</b>                           | <b>6</b>    |
|                     | 4.1 Symbols  | 6           |
|                     | 4.2 Abbreviated terms  | 8           |
| <b>5</b>            | <b>Overall considerations</b>                                  | <b>9</b>    |
|                     | 5.1 Design situations  | 9           |
|                     | 5.2 Codes and standards  | 9           |
|                     | 5.3 Deck elevation and green water                             | 10          |
|                     | 5.4 Exposure level   | 10          |
|                     | 5.5 Operational considerations                                 | 10          |
|                     | 5.6 Selecting the design environmental conditions              | 11          |
|                     | 5.7 Assessment of existing topsides structures                 | 11          |
|                     | 5.8 Reuse of topsides structure                                | 11          |
|                     | 5.9 Modifications and refurbishment                            | 11          |
| <b>6</b>            | <b>Design requirements</b>                                     | <b>11</b>   |
|                     | 6.1 General  | 11          |
|                     | 6.2 Materials selection  | 11          |
|                     | 6.3 Design conditions  | 11          |
|                     | 6.4 Structural interfaces                                      | 12          |
|                     | 6.5 Design for serviceability limit states (SLS)               | 12          |
|                     | 6.6 Design for ultimate limit states (ULS)                     | 14          |
|                     | 6.7 Design for fatigue limit states (FLS)                      | 15          |
|                     | 6.8 Design for accidental limit states (ALS)                   | 15          |
|                     | 6.9 Robustness   | 15          |
|                     | 6.10 Corrosion control   | 16          |
|                     | 6.11 Design for fabrication and inspection                     | 16          |
|                     | 6.12 Design considerations for structural integrity management | 17          |
|                     | 6.13 Design for decommissioning, removal and disposal          | 17          |
| <b>7</b>            | <b>Actions</b>   | <b>17</b>   |
|                     | 7.1 General  | 17          |
|                     | 7.2 In-place actions   | 18          |
|                     | 7.3 Action factors   | 20          |
|                     | 7.4 Vortex-induced vibrations                                  | 21          |
|                     | 7.5 Deformations   | 21          |
|                     | 7.6 Wave and current actions                                   | 22          |
|                     | 7.7 Wind actions   | 22          |
|                     | 7.8 Seismic actions  | 22          |
|                     | 7.9 Actions during fabrication and installation                | 24          |
|                     | 7.10 Accidental situations                                     | 24          |
|                     | 7.11 Other actions   | 34          |

|           |  |           |
|-----------|--|-----------|
| <b>8</b>  | <b>Strength and resistance of structural components</b>                  | <b>36</b> |
| 8.1       | Use of local building standards  | 36        |
| 8.2       | Cylindrical tubular member design  | 36        |
| 8.3       | Design of non-cylindrical sections                                       | 37        |
| 8.4       | Connections  | 37        |
| 8.5       | Castings   | 38        |
| <b>9</b>  | <b>Structural systems</b>  | <b>39</b> |
| 9.1       | Topsides design  | 39        |
| 9.2       | Topsides structure design models   | 39        |
| 9.3       | Support structure interface  | 40        |
| 9.4       | Flare towers, booms, vents and similar structures                        | 40        |
| 9.5       | Helicopter landing facilities (helidecks)                                | 41        |
| 9.6       | Crane support structure  | 44        |
| 9.7       | Derrick design   | 47        |
| 9.8       | Bridges  | 47        |
| 9.9       | Bridge bearings  | 48        |
| 9.10      | Anti-vibration mountings for modules and major equipment skids           | 48        |
| 9.11      | System interface assumptions   | 48        |
| 9.12      | Fire protection systems  | 49        |
| 9.13      | Penetrations   | 49        |
| 9.14      | Difficult-to-inspect areas   | 49        |
| 9.15      | Drainage   | 49        |
| 9.16      | Actions due to drilling operations                                       | 49        |
| 9.17      | Strength reduction due to heat   | 49        |
| 9.18      | Walkways, laydown areas and equipment maintenance                        | 50        |
| 9.19      | Muster areas and lifeboat stations                                       | 50        |
| <b>10</b> | <b>Materials</b>   | <b>50</b> |
| 10.1      | General  | 50        |
| 10.2      | Carbon steel   | 51        |
| 10.3      | Stainless steel  | 53        |
| 10.4      | Aluminium alloys   | 54        |
| 10.5      | Fibre-reinforced composites  | 55        |
| 10.6      | Timber   | 55        |
| <b>11</b> | <b>Fabrication, quality control, quality assurance and documentation</b> | <b>55</b> |
| 11.1      | Assembly   | 55        |
| 11.2      | Welding  | 56        |
| 11.3      | Fabrication inspection   | 56        |
| 11.4      | Quality control, quality assurance and documentation                     | 56        |
| 11.5      | Corrosion protection   | 57        |
| <b>12</b> | <b>Corrosion control</b>   | <b>57</b> |
| 12.1      | General  | 57        |
| 12.2      | Forms of corrosion, associated corrosion rates and corrosion damage      | 57        |
| 12.3      | Design of corrosion control  | 57        |
| 12.4      | Fabrication and installation of corrosion control                        | 58        |
| 12.5      | In-service inspection, monitoring and maintenance of corrosion control   | 59        |
| <b>13</b> | <b>Loadout, transportation and installation</b>                          | <b>59</b> |
| <b>14</b> | <b>In-service inspection and structural integrity management</b>         | <b>60</b> |
| 14.1      | General  | 60        |
| 14.2      | Particular considerations applying to topsides structures                | 60        |
| 14.3      | Topsides structure default inspection scopes                             | 61        |

**15 Assessment of existing topsides structures .....62**  
**16 Reuse of topsides structure.....63**  
**Annex A (informative) Additional information and guidance .....64**  
**Annex B (informative) Example calculation of building code correspondence factor ..... 108**  
**Annex C (informative) Regional information ..... 114**  
**Bibliography..... 115**
