ISO 15156-3:2015-09 (E)

Petroleum and natural gas industries - Materials for use in H2S-containing environments in oil and gas production - Part 3: Cracking-resistant CRAs (corrosion-resistant alloys) and other alloys

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 2

3 Termsanddefinitions 3

4 Symbols and abbreviated terms 4

5 Factors affecting the cracking-resistance of CRAs and other alloys in H2S- containing environments 5

6 QualificationandselectionofCRAsandotheralloyswithrespecttoSSC,SCC,and GHSC in H2S-containing environments 5
6.1 General 5
6.2 Evaluation of materials properties 6
6.2.1 Hardness of parent metals 6
6.2.2 Cracking-resistance properties of welds 6
6.2.3 Cracking-resistance properties associated with other fabrication methods 8
6.3 PREN 8

7 Purchasing information and marking 8
7.1 Information that should be supplied for material purchasing 8
7.2 Marking, labelling, and documentation 9

Annex A (normative) Environmental cracking-resistant CRAs and other alloys (including Table A.1 -- Guidance on the use of the materials selection tables) 10

Annex B (normative)QualificationofCRAsforH2S-service by laboratory testing 56

Annex C (informative) Information that should be supplied for material purchasing 66

Annex D (informative) Materials chemical compositions and other information 68

Annex E (informative) Nominated sets of test conditions 84
