DIN EN ISO 15589-1:2019-09 (E)

Petroleum, petrochemical and natural gas industries - Cathodic protection of pipeline systems - Part 1: On-land pipelines (ISO 15589- 1:2015)

Contents

Page

European foreword ... 5
Foreword ... 6
Introduction ... 7
1 Scope ... 8
2 Normative references ... 8
3 Terms and definitions ... 9
4 Symbols and abbreviations ... 12
4.1 Symbols ... 12
4.2 Abbreviations ... 14
5 CP personnel competence ... 14
6 Cathodic protection criteria ... 15
6.1 General ... 15
6.2 Protection potentials ... 15
6.3 Alternative methods ... 17
6.3.1 100 mV cathodic potential shift ... 17
6.3.2 Other methods ... 17
6.4 Criteria in the presence of a.c. ... 17
7 Pre-requisites for the application of cathodic protection ... 17
7.1 General ... 17
7.2 Electrical continuity ... 17
7.3 Electrical isolation ... 18
7.3.1 General ... 18
7.3.2 Locations ... 18
7.3.3 Isolating joints ... 18
7.3.4 Internal corrosion risks at isolating joints ... 19
7.3.5 Contacts between metallic structures ... 20
7.3.6 Electrical earthing system ... 20
7.4 Lightning and overvoltage protection ... 21
7.5 Coating ... 22
7.5.1 General ... 22
7.5.2 Factory-applied coatings ... 22
7.5.3 Field joint coatings ... 22
7.5.4 Coating for trenchless pipelines ... 22
7.5.5 Air to electrolyte interface ... 23
7.5.6 Compatibility of coatings and wraps with cathodic protection ... 23
7.5.7 Thermal insulation ... 23
7.5.8 Reinforced concrete weight coating ... 24
7.6 Selection of pipe trench backfill material ... 24
7.7 Buried casings for pipelines ... 24
7.7.1 General ... 24
7.7.2 Casings that shield cathodic protection current ... 24
7.7.3 Casings that pass cathodic protection current ... 25
7.8 Equipment for the reduction of a.c. interference ... 25
7.9 Equipment for the mitigation of d.c. interference ... 25

8 Basic requirements for cathodic protection design 25
8.1 General 25
8.2 Basic information for cathodic protection design 26
8.3 Contents of cathodic protection design report 27
8.4 Cathodic protection current demand 27
8.4.1 Calculation of the theoretical total current demand 27
8.4.2 Current demand based on coating breakdown factors 28
8.4.3 Current demand based on current density values for coated pipelines 29
8.5 Cathodic protection equipment 30
8.5.1 Cathodic protection cables 30
8.5.2 Cable connection 31
8.5.3 Precautions to respect for distribution boxes and test stations 32
8.6 Temporary protection 33
8.7 Specific case of existing pipelines 33
8.7.1 General 33
8.7.2 Parallel pipelines 34
8.7.3 Parallelism or crossing with a.c. power systems 34
8.8 Trenchless installation methods 34
9 Impressed current stations 35
9.1 General 35
9.2 Power supply 35
9.3 Groundbeds 36
9.3.1 General 36
9.3.2 Deep-well groundbeds 36
9.3.3 Shallow groundbeds 37
9.3.4 Impressed-current anodes and conductive backfill 38
9.4 Output control 39
9.4.1 General 39
9.4.2 Current distribution for multiple pipelines 39
9.4.3 Potential control 40
10 Galvanic anode systems 40
10.1 General 40
10.2 Design requirements 41
10.3 Zinc anodes 41
10.4 Magnesium anodes 42
10.5 Design of the anode system 44
10.6 Anode backfill 45
10.7 Cables and cable connections 46
10.8 Anode installation 46
11 Monitoring facilities 46
11.1 General 46
11.2 Locations of test stations 46
11.3 Description of test stations 47
11.4 Use of probes and coupons 47
11.5 Bonding to other pipelines 48
11.6 Test facilities at cased crossings 48
11.7 Test facilities at isolating joints 48
11.8 Line current monitoring test stations 48
11.9 Drain-point test facilities 48
11.10 Miscellaneous monitoring facilities 48
12 Commissioning 48
12.1 General 48
12.2 Preliminary tests 49

12.3 Start up ... 50
12.3.1 Impressed current stations ... 50
12.3.2 Galvanic anodes ... 50
12.3.3 Drainage stations ... 51
12.3.4 Test stations ... 51
12.4 Verification of cathodic protection effectiveness ... 51
12.4.1 General ... 51
12.4.2 Measurements of d.c. potential and a.c. voltage ... 51
12.4.3 Current measurements ... 52
12.4.4 Adjustments ... 52
12.5 Commissioning report ... 52
12.5.1 Installation documentation ... 52
12.5.2 Commissioning measurements ... 52
13 Monitoring, inspection, and maintenance ... 53
13.1 General ... 53
13.2 Implementation of inspection ... 54
13.3 Periodicities of inspection ... 54
13.4 Remote monitoring ... 57
13.5 Specialized surveys ... 57
13.6 Monitoring plan ... 57
13.7 Monitoring equipment ... 57
13.8 Maintenance and repair ... 58
14 Documentation ... 58
14.1 Design documentation ... 58
14.1.1 General ... 58
14.1.2 Construction details and installation procedures ... 59
14.2 Commissioning documentation ... 60
14.3 Operating and maintenance documentation ... 60
14.3.1 General ... 60
14.3.2 Inspection and monitoring data ... 61
14.3.3 Maintenance records ... 61
Annex A (normative) Cathodic protection measurements ... 62
Annex B (normative) Electrical interference ... 70
Annex C (informative) Fault detection of impressed-current systems during operation ... 74
Annex D (informative) Description of specialized surveys ... 76
Annex E (informative) Attenuation of protection ... 83
Annex F (informative) Electrical tests for isolating joints before installation ... 86
Bibliography ... 87
