# ISO 20676:2018 (E)

## Natural gas — Upstream area — Determination of hydrogen sulfide content by laser absorption spectroscopy

## Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

4.1 Working principle of the hydrogen sulfide laser absorption analyser
4.2 Calculation formulae

5 Measurement device

5.1 Laser hydrogen sulfide analyser
5.1.1 Laser analyser
5.1.2 Laser generator
5.2 Gas pressure regulator
5.3 Flow rate meter
5.4 Hydrogen sulfide absorber

6 Reagents and material

6.1 Calibration gas
6.2 Methane
6.3 Absorb solution of hydrogen sulfide

7 Measurement

7.1 Preparation
7.2 Calibration of analyser
7.2.1 Calibration frequency
7.2.2 Calibration procedure
7.2.3 Calibration method
7.3 Sampling
7.4 Measurement of hydrogen sulfide in natural gas sample
7.5 Data processing

8 Repeatability

9 Uncertainty evaluation

9.1 Principle
9.2 Uncertainty of As
9.3 Uncertainty of Aref
9.4 Uncertainty of Cref
9.5 Uncertainty of result

Annex A (informative) Example of statistical procedure for estimation of the repeatability

A.1 Background
A.2 Experiments
A.3 Raw data of the test
A.4 Calculation of the mean of each analysis
A.5 Calculation of repeatability
