

DIN EN ISO 19900:2019-10 (E)

Petroleum and natural gas industries - General requirements for offshore structures (ISO 19900:2019); English version EN ISO 19900:2019

Contents

Page

Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Symbols and abbreviated terms	8
4.1 Symbols	8
4.2 Abbreviated terms	9
5 Fundamental requirements	9
5.1 General	9
5.2 Structural integrity requirements	10
5.3 Functional requirements	10
5.4 Requirements for specific phases of the life of the structure	11
5.4.1 Planning	11
5.4.2 Construction and deployment	11
5.4.3 Structural integrity management	11
5.4.4 Decommissioning and removal	11
5.5 Requirements for durability and robustness	12
5.5.1 Durability, maintenance and inspection	12
5.5.2 Robustness	12
6 Basis for design/assessment	13
6.1 General	13
6.2 Platform location and orientation	13
6.3 Physical environmental conditions	14
6.4 Geotechnical and geophysical conditions	14
6.4.1 Marine site investigations	14
6.4.2 Seabed instability	15
6.4.3 Seabed disturbance	15
6.5 Specific design/assessment requirements	16
6.5.1 Topsides structures	16
6.5.2 Deck elevation	16
6.5.3 Splash zone	17
6.5.4 Stationkeeping systems	17
6.5.5 Conductor and riser systems	17
6.5.6 Foundations and anchoring	17
6.5.7 Additional operational requirements	18
7 Development of design/assessment situations	18
7.1 Hazards	18
7.2 Hazardous events	18
7.3 Exposure levels	19
7.3.1 General	19
7.3.2 Exposure level L1	20
7.3.3 Exposure level L2	20
7.3.4 Exposure level L3	20

7.4	Design/assessment situations	21
7.4.1	General	21
7.4.2	Operational design/assessment situations	21
7.4.3	Extreme design/assessment situations	22
7.4.4	Abnormal design/assessment situations	22
7.4.5	Accidental design/assessment situations	23
7.4.6	Short duration design/assessment situations	23
7.4.7	Serviceability design/assessment situations	24
8	Limit state verification	24
8.1	General	24
8.2	Basic variables and representative values	25
8.3	Limit states	26
8.3.1	Categories of limit states	26
8.3.2	Ultimate limit states	26
8.3.3	Abnormal/accidental limit states	27
8.3.4	Serviceability limit states	27
8.3.5	Fatigue limit states	27
8.4	Limit state verification procedure	28
9	Actions	28
9.1	Classifications of actions	28
9.2	Permanent actions and their representative values	29
9.3	Operational actions and their representative values	29
9.4	Environmental actions and their representative values	30
9.5	Accidental actions and their representative values	31
9.6	Repetitive actions	31
10	Design values and partial factors	32
10.1	Design values of actions	32
10.2	Actions acting in combination	32
10.2.1	Principal and companion actions for the same action type	32
10.2.2	Principal and accompanying actions for specific design/assessment situations	33
10.3	Design values of resistance	33
10.3.1	General	33
10.3.2	Design values of materials including soils	33
10.3.3	Design values of geometric variables	34
10.3.4	Uncertainties in analysis models	34
10.4	Partial factors for operational and extreme design/assessment situations	34
10.5	Partial factors for abnormal and accidental design/assessment situations	34
10.6	Partial factors for serviceability design/assessment situations	35
10.7	Partial factors for fatigue design/assessment verification	35
10.8	Probabilistic modelling and analysis	35
11	Models and analysis	35
12	Quality management	36
12.1	General	36
12.2	Installation inspection	36
12.3	In-service inspection, maintenance and repair	36
12.4	Records and documentation of design and construction	37
12.4.1	General	37
12.4.2	Calculations	37
12.4.3	Weight and centre of gravity reports	38
12.4.4	Drawings and specifications	38
13	Assessment of existing structures	38
13.1	General	38
13.2	Condition assessment	39
13.2.1	General	39
13.2.2	Service and operating requirements	39
13.2.3	Environmental conditions	39
13.2.4	Testing, inspection, maintenance and repair history	39

13.3	Action assessment.....	40
13.4	Resistance assessment.....	40
13.5	Component and system failure consequences.....	40
13.6	Mitigation.....	40
Annex A (informative) Additional information and guidance		41
