ISO 15156-1:2020 (E)

Petroleum and natural gas industries — Materials for use in H2S-containing environments in oil and gas production — Part 1: General principles for selection of cracking-resistant materials

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Abbreviated terms

5 General principles

6 Evaluation and definition of service conditions to enable material selection

7 Selection of materials resistant to SSC/SCC in the presence of sulfides from existing lists and tables

8 Qualification of materials for H2S service

8.1 Material description and documentation
8.2 Qualification based upon field experience
8.3 Qualification based upon laboratory testing
8.3.1 General
8.3.2 Sampling of materials for laboratory testing
8.3.3 Selection of laboratory test methods
8.3.4 Conditions to be applied during testing
8.3.5 Acceptance criteria

9 Report of the method of selection or qualification
