

DIN EN ISO 15156-3:2025-02 (E)

Petroleum and natural gas industries - Materials for use in H₂S-containing environments in oil and gas production - Part 3: Cracking-resistant CRAs (corrosion-resistant alloys) and other alloys (ISO 15156-3:2020)

Contents		Page
European foreword.....		3
Foreword.....		4
Introduction.....		6
1	Scope	7
2	Normative references	8
3	Terms and definitions	9
4	Symbols and abbreviated terms	11
5	Factors affecting the cracking-resistance of CRAs and other alloys in H₂S-containing environments	12
6	Qualification and selection of CRAs and other alloys with respect to SSC, SCC, and GHSC in H₂S-containing environments	12
6.1	General.....	12
6.2	Evaluation of materials properties.....	13
6.2.1	Hardness of parent metals.....	13
6.2.2	Cracking-resistance properties of welds.....	13
6.2.3	Cracking-resistance properties associated with other fabrication methods.....	14
6.3	PREN.....	15
7	Purchasing information and marking	15
7.1	Information that should be supplied for material purchasing.....	15
7.2	Marking, labelling, and documentation.....	16
Annex A (normative) Environmental cracking-resistant CRAs and other alloys (including Table A.1 — Guidance on the use of the materials selection tables)		17
Annex B (normative) Qualification of CRAs for H₂S-service by laboratory testing		63
Annex C (informative) Information that should be supplied for material purchasing		73
Annex D (informative) Nominated sets of test conditions		75
Bibliography		76
