

ISO/TS 12835:2022-03 (E)

Qualification of casing connections for thermal wells

Contents		Page
Foreword		vi
Introduction		vii
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 Abbreviated terms and symbols		5
4.1 Abbreviated terms.....		5
4.2 Symbols.....		6
5 Program overview		7
5.1 Illustrations of selected definitions.....		7
5.2 Program flowchart.....		7
6 Overview and fundamental assumptions		8
6.1 General.....		8
6.2 Main features.....		8
6.2.1 Purpose.....		8
6.2.2 Applicability to service conditions.....		9
6.2.3 Rationale for development.....		9
6.2.4 Subject of evaluation.....		9
6.2.5 Application severity levels.....		9
6.3 Assessment philosophy and principles.....		10
6.3.1 Fundamental principles.....		10
6.3.2 Conservative evaluation procedure.....		11
6.3.3 Mandatory and optional tasks.....		11
6.3.4 Use of analysis and physical testing.....		12
6.3.5 Performance measures.....		12
6.3.6 Assessment criteria.....		12
6.3.7 Task outcomes — data categories.....		13
6.3.8 Prior evaluation data.....		13
6.3.9 Treatment of confidential design information.....		13
6.3.10 Interpretation of evaluation results.....		14
6.3.11 Avoiding perception of conflict of interest.....		14
6.4 Evaluation variables.....		14
6.4.1 Connection loading.....		14
6.4.2 Impacts of contributing variables.....		14
6.4.3 Pin-box interferences and tapers.....		16
6.4.4 Material yield strength.....		16
6.5 Evaluation procedure.....		17
6.5.1 Safety standards.....		17
6.5.2 Seepage assessment — random variations.....		17
6.5.3 Seepage rate thresholds.....		17
6.5.4 Seal isolation.....		18
6.5.5 Dope entrapment.....		18
6.5.6 Thermal cycle test — bake-out and hold durations.....		18
6.5.7 Pressure and temperature loading in thermal cycle test and analysis.....		19
6.5.8 Dependence of material strength on temperature.....		19
6.6 Scope of reporting.....		20
7 Program roles and proprietary design information		20

7.1	Program execution roles	20
7.2	Proprietary connection design information.....	20
8	Conformance requirements.....	21
8.1	Conformant evaluation program.....	21
8.2	Program non-conformances.....	21
8.3	Performance acceptance.....	22
8.4	Conformance of results from previous evaluations.....	22
8.5	Use of data from previous evaluations.....	22
8.6	Conformance to lower ASLs.....	23
9	Application severity levels.....	23
9.1	Thermal well load path.....	23
9.2	Temperature as controlling parameter.....	25
9.3	Specifications for application severity levels.....	26
9.4	Selection of application severity level.....	27
10	Program blocks and tasks.....	27
10.1	Evaluation procedure overview.....	27
10.2	Critical path tasks.....	31
11	Program specifications.....	32
11.1	Task overview.....	32
11.2	Identification of program roles.....	32
11.3	Identification of candidate connection.....	33
11.4	Program options.....	34
11.5	Data from prior evaluations.....	35
12	Determination of biased test population.....	35
12.1	Task overview.....	35
12.2	Initial material property characterization.....	36
12.2.1	Task description, definitions, methods.....	36
12.2.2	Testing conditions and scope.....	37
12.2.3	Procedure for tensile tests.....	39
12.2.4	Interpretation and processing of tensile test results.....	40
12.3	Specimen configuration analysis.....	45
12.3.1	Task description.....	45
12.3.2	Modelling and reporting requirements.....	46
12.3.3	Nominal reference case.....	47
12.3.4	Worst-case geometry configurations.....	48
12.3.5	Seal taper analysis.....	50
12.3.6	Impacts of material property variations.....	51
12.3.7	Make-up torque for sealability tests.....	54
12.3.8	Test versus production specimens.....	56
13	Specimen procurement.....	56
13.1	Task overview.....	56
13.2	Specimen pipe procurement.....	57
13.3	Material property verification.....	57
13.3.1	Task description.....	57
13.3.2	Specimens for tensile verification tests.....	57
13.3.3	Scope of tensile verification tests.....	58
13.3.4	Coefficient of thermal expansion verification test.....	59
13.4	Test specimen machining and gauging.....	60
13.4.1	General requirements.....	60
13.4.2	Specimen naming convention.....	60
13.4.3	Specimen length and length-reference requirements.....	61
13.4.4	Geometrical configurations.....	62
13.4.5	Mother pipe for specimens.....	62
13.4.6	Specimen machining tolerances.....	63
13.5	Markings.....	65
13.6	Specimen geometry verification.....	65
13.6.1	Gauging inspection scope.....	65
13.6.2	Inspection extent – example cases.....	66
13.6.3	Geometry inspection guidelines.....	66
13.7	Procurement and quality control of connection interfacial components.....	67

13.8	Specimen handling and storage	67
13.8.1	Handling recommendations	67
13.8.2	Treatment of damaged specimens	68
14	Full-scale physical tests and supplementary analyses	68
14.1	Task overview	68
14.2	Full-scale tests - general requirements	69
14.2.1	Ambient temperature at test site	69
14.2.2	Calibration of instrumentation	69
14.2.3	Disabling of secondary seals	70
14.2.4	Seepage measurement and rate definitions	70
14.2.5	Load application rates	72
14.2.6	Excluded connections	72
14.3	Galling resistance test	73
14.3.1	Task description	73
14.3.2	Rationale and objectives	74
14.3.3	Make-break specimens	74
14.3.4	Scope of galling resistance test	74
14.3.5	Set-up and instrumentation	75
14.3.6	Test procedure	76
14.3.7	Performance assessment	77
14.3.8	Reporting	78
14.4	Thermal cycle test	78
14.4.1	Task description	78
14.4.2	Rationale and objectives	78
14.4.3	Thermal cycle specimens	79
14.4.4	Scope of thermal cycle test	79
14.4.5	Mechanical strain compensations	82
14.4.6	Set-up and instrumentation	85
14.4.7	Test procedure	91
14.4.8	Performance assessment	96
14.4.9	Selection of cycled specimens for bend test and limit-strain test	97
14.4.10	Reporting	97
14.5	Bending evaluation	97
14.6	Limit-strain test	98
14.6.1	Task description	98
14.6.2	Rationale and objectives	98
14.6.3	Limit-strain specimens	99
14.6.4	Mandatory test description	99
14.6.5	Set-up and instrumentation	101
14.6.6	Mandatory test procedure	103
14.6.7	Performance assessment	108
14.6.8	Reporting	108
14.7	As-tested configuration analysis	108
15	Evaluation and inspection reports	108
15.1	Reporting deliverables	108
15.2	Reporting scope and contents	109
15.3	Reporting templates	113
	Annex A (informative) FEA modelling guidelines	114
	Annex B (informative) Derivations of formulae - Strain compensation factors	124
	Annex C (informative) Program role assignments and responsibilities	133
	Annex D (informative) Optional program selections, tasks, and procedures	140
	Bibliography	163
