ISO/TS 20790:2024-10 (E)

Oil and gas industries including lower carbon energy - Guidelines for green manufacturing and lower carbon emission of oil and gas-field equipment and materials

Contents

Page

Foreword ..... **v**

Introduction ..... **vi**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 General **3**

5 Green attributes **4**

5.1 Principles for determination 4

5.1.1 General purpose 4

5.1.2 Operational and measurable 4

5.1.3 Systematic and specific 4

5.2 Green attribute system 5

5.3 Green attribute content and measurement indexes 5

6 Basic principles **6**

6.1 General 6

6.2 Green design 6

6.2.1 General 6

6.2.2 Materials 7

6.2.3 Structure 7

6.3 Green processing 8

6.3.1 Application of new processes 8

6.3.2 Resource consumption control 8

6.3.3 Emission control 8

6.4 Operation process 8

6.5 Resource and energy cyclic utilization 8

7 Typical practices **8**

7.1 General 8

7.2 Practices mainly contributing to carbon replacement 9

7.2.1 Pure hydrogen or hydrogen-mixed pipeline transmission 9

7.2.2 Underground hydrogen storage 9

7.3 Practices mainly contributing to carbon emission reduction 10

7.3.1 Application of low consumption and low emission power engine 10

7.3.2 Drilling rig potential energy recovery and application of energy storage 10

7.3.3 "Well factory" large platform drilling 10

7.3.4 Coating for pipelines and storages 10

7.3.5 Remanufacturing 11

7.4 Practices mainly contributing to carbon storage 11

7.5 Practices mainly contributing to others 11

7.5.1 Waste liquid treatment 11

7.5.2 Materials used for aggressive environments 12

8 Green assessment **12**

8.1 Green assessment content 12

8.2 Green assessment methods 12

8.2.1 Life cycle assessment method 12

8.2.2 Other methods 13

9 Green management **13**
9.1 Basic ideas and process 13
9.2 Recommendations for the related parties 14
9.3 Product documentation 14
9.4 Identification 14
Annex A (informative) **Examples of green processes and techniques** **15**
Annex B (informative) **An example of life cycle assessment** **17**
Bibliography **20**
