|---------------------------------------------------------------------------------|----|
| Foreword.....                                                                   | 4  |
| Introduction .....                                                              | 5  |
| 1 Scope.....                                                                    | 6  |
| 2 Normative references .....                                                    | 7  |
| 3 Terms and definitions.....                                                    | 8  |
| 4 Symbols and abbreviated terms.....                                            | 8  |
| 5 Materials of construction and wall thickness limitations .....                | 9  |
| 5.1 General .....                                                               | 9  |
| 5.2 Fibre.....                                                                  | 9  |
| 5.3 Resin.....                                                                  | 9  |
| 5.4 Joints.....                                                                 | 9  |
| 5.5 Wall thickness limitations .....                                            | 10 |
| 6 Qualification programme.....                                                  | 11 |
| 6.1 General .....                                                               | 11 |
| 6.2 Qualification pressure and temperature .....                                | 12 |
| 6.3 Effect of temperature and chemical resistance .....                         | 22 |
| 6.4 Optional qualification requirements .....                                   | 23 |
| 6.5 Fire performance.....                                                       | 24 |
| 6.6 Electrical conductivity and electrostatic dissipative properties.....       | 27 |
| 6.7 Additional component properties.....                                        | 30 |
| 6.8 Component data for quality control baseline.....                            | 31 |
| 7 Preferred dimensions .....                                                    | 32 |
| 7.1 Nominal diameters .....                                                     | 32 |
| 7.2 Bend radii.....                                                             | 33 |
| 7.3 Fitting lengths.....                                                        | 33 |
| 8 Quality programme for manufacture.....                                        | 33 |
| 8.1 General requirements .....                                                  | 33 |
| 8.2 Quality control equipment.....                                              | 33 |
| 8.3 Quality control tests .....                                                 | 34 |
| 8.4 Quality control records.....                                                | 40 |
| 9 Component marking .....                                                       | 41 |
| 9.1 General .....                                                               | 41 |
| 9.2 Requirements .....                                                          | 41 |
| 10 Handling, storage and transportation.....                                    | 41 |
| 11 Documentation .....                                                          | 42 |
| 11.1 General .....                                                              | 42 |
| 11.2 Purchase order documentation .....                                         | 42 |
| 11.3 Qualification documentation.....                                           | 42 |
| 11.4 Production quality control documentation .....                             | 43 |
| 11.5 Installation documentation .....                                           | 43 |
| 11.6 Published values .....                                                     | 44 |
| Annex A (informative) Examples of component requirements for qualification..... | 46 |
| Annex B (informative) Pressure qualification test ratios .....                  | 48 |
| Annex C (normative) Failure envelope.....                                       | 51 |

|                                                                                                                                                               |           |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Annex D (informative) Guidance on determination of partial factors <math>A_1</math> and <math>A_2</math> for temperature and chemical resistance .....</b> | <b>53</b> |
| <b>Annex E (normative) Fire endurance testing .....</b>                                                                                                       | <b>55</b> |
| <b>Annex F (normative) Modifications to fire reaction test procedures .....</b>                                                                               | <b>64</b> |
| <b>Annex G (normative) Determination of electrostatic properties of GRP pipe system components .....</b>                                                      | <b>66</b> |
| <b>Annex H (normative) Preferred dimensions .....</b>                                                                                                         | <b>76</b> |
| <b>Annex I (informative) Example of enquiry sheet .....</b>                                                                                                   | <b>79</b> |
| <b>Annex J (informative) Example of qualification summary form .....</b>                                                                                      | <b>80</b> |
| <b>Annex K (normative) Least-square method for calculating the long-term hydrostatic pressure from regression data .....</b>                                  | <b>82</b> |
| <b>Bibliography .....</b>                                                                                                                                     | <b>90</b> |
