

DIN EN ISO 13503-2:2007-02 (E)

Petroleum and natural gas industries - Completion fluids and materials - Part 2:
Measurement of properties of proppants used in hydraulic fracturing and gravel-
packing operations (ISO 13503-2:2006); English version EN ISO 13503-2:2006

Inhalt	Seite
Foreword	4
Endorsement notice	4
1 Scope	6
2 Normative references	6
3 Abbreviations	6
4 Standard proppant sampling procedure	6
4.1 General	6
4.2 Particle segregation	7
4.3 Equipment	7
4.4 Number of required samples — Bulk	9
4.5 Sampling — Bulk material	10
4.6 Sampling — Bagged material	10
5 Sample handling and storage	10
5.1 Sample reduction	10
5.2 Sample splitting	10
5.3 Sample and record retention and storage	10
6 Sieve analysis	10
6.1 Purpose	10
6.2 Description	11
6.3 Equipment and materials	11
6.4 Procedure	11
6.5 Calculation of the mean diameter, median diameter and standard deviation	12
6.6 Sieve calibration	14
7 Proppant sphericity and roundness	16
7.1 Purpose	16
7.2 Description	17
7.3 Apparatus capability	17
7.4 Procedure	17
7.5 Alternate method for determining average sphericity and roundness	18
8 Acid solubility	18
8.1 Purpose	18
8.2 Description	18
8.3 Equipment and materials	19
8.4 Procedure	19
9 Turbidity test	20
9.1 Purpose	20
9.2 Description	21
9.3 Equipment and materials	21
9.4 Equipment calibration	21
9.5 Procedure	21
10 Procedures for determining proppant bulk density, apparent density and absolute density	22
10.1 Purpose	22
10.2 Description	22

10.3	Bulk density.....	22
10.4	Apparent density.....	24
10.5	Absolute density	26
11	Proppant crush-resistance test.....	26
11.1	Purpose.....	26
11.2	Description	26
11.3	Equipment and materials	27
11.4	Sample preparation	27
11.5	Crush-resistance procedure.....	28
12	Loss on ignition of resin-coated proppant	30
12.1	Objective.....	30
12.2	Apparatus and materials.....	30
12.3	Loss-on-ignition procedure for whole-grain proppant	30
	Annex A (informative) Formazin solution preparation	32
A.1	Preparation of a formazin polymer solution for calibration	32
A.2	Equipment Calibration	32
