

ISO 19903:2006-12 (E)

Petroleum and natural gas industries - Fixed concrete offshore structures

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Symbols and abbreviated terms	8
4.1	Symbols	8
4.2	Abbreviated terms	10
5	General requirements	11
5.1	General	11
5.2	National requirements	11
5.3	Overall planning requirements	11
5.4	Functional requirements	12
5.5	Structural requirements	13
5.6	Design requirements	14
6	Actions and action effects	16
6.1	General	16
6.2	Environmental actions	17
6.3	Other actions	22
6.4	Partial factors for actions	27
6.5	Combinations of actions	28
6.6	Exposure levels	30
7	Structural analysis	31
7.1	General	31
7.2	General principles	31
7.3	Physical representation	34
7.4	Types of analyses	38
7.5	Analyses requirements	41
8	Concrete works	46
8.1	General	46
8.2	Design	48
8.3	Materials	51
8.4	Execution	57
8.5	Geometrical tolerances	70
8.6	Quality control -- Inspection, testing and corrected actions	73
9	Foundation design	77
9.1	Introduction	77
9.2	General	77
9.3	Soil investigation	78
9.4	Representative soil properties	78
9.5	Partial factors for actions and materials	78
9.6	Geotechnical design principles	79

9.7	Bearing and sliding stability	80
9.8	Soil reactions on structures	81
9.9	Installation and removal	81
9.10	Scour	82
10	Mechanical systems	82
10.1	Introduction	82
10.2	Permanent mechanical systems	83
10.3	Mechanical systems -- Temporary	90
10.4	Attachments and penetrations	93
10.5	Mechanical systems -- Special considerations	94
11	Marine operations and construction afloat	95
11.1	General	95
11.2	Engineering and planning	96
12	Corrosion control	96
12.1	Introduction	96
12.2	Design for corrosion control	98
12.3	Fabrication and installation of systems for corrosion control	102
13	Topsides interface design	103
13.1	Introduction	103
13.2	Basis for design	104
13.3	Deck/shaft structural connection	104
13.4	Topsides -- Structure mating	105
13.5	Transportation, tow-to-field	105
14	Inspection and condition monitoring	105
14.1	General	105
14.2	Objective	105
14.3	Personnel qualifications	106
14.4	Planning	106
14.5	Documentation	107
14.6	Important items related to inspection and condition monitoring	108
14.7	Inspection and condition monitoring types	111
14.8	Marking	112
14.9	Guidance for inspection of special areas	112
15	Assessment of existing structures	115
15.1	General	115
15.2	Structural assessment initiators	116
	Annex A (informative) Regional information	117
	Bibliography	119
