## Paper and board - Determination of air permeance (medium range) - Part 5: Gurley method

---

| <b>Contents</b>  |   | <b>Page</b> |
|--|---|-------------|
| Foreword .....   |   | iv          |
| 1  | Scope .....   | 1           |
| 2  | Normative references .....                            | 1           |
| 3  | Terms and definitions .....                           | 1           |
| 4  | Principle .....                                       | 2           |
| 5  | Apparatus and materials .....                         | 2           |
| 6  | Sampling .....  | 4           |
| 7  | Conditioning .....                                    | 4           |
| 8  | Preparation of test pieces .....                      | 4           |
| 9  | Calibration .....                                     | 4           |
| 10   | Procedure .....                                       | 4           |
| 11   | Calculation and expression of results .....           | 5           |
| 11.1   | Calculation of air permeance .....                    | 5           |
| 11.2   | Reporting the results .....                           | 5           |
| 11.3   | Standard deviation and coefficient of variation ..... | 5           |
| 12   | Test report .....                                     | 5           |
| Annex A (normative) Volume check -- Gurley apparatus ..... |   | 7           |
| Annex B (informative) Variations in apparatus .....        |   | 9           |
| Annex C (informative) Precision data .....                 |   | 10          |
| Bibliography .....   |   | 12          |
