# DIN EN ISO 18314-2:2023-03 (E)

## Analytical colorimetry - Part 2: Saunderson correction, solutions of the Kubelka-Munk equation, tinting strength, depth of shade, hiding power (ISO 18314-2:2023)

## Contents

Page

**European foreword** ... **3**

**Foreword** ... **4**

**1 Scope** ... **5**

**2 Normative references** ... **5**

**3 Terms and definitions** ... **5**

**4 Symbols and abbreviated terms** ... **7**

**5 Saunderson correction** ... **8**
5.1 General ... 8
5.2 Incidence diffuse, observation 0° (d:0°) ... 9
5.3 Incidence 45°, observation 0° (45°:0°) ... 9

**6 Solution of the Kubelka-Munk equations** ... **9**
6.1 General ... 9
6.2 Method 1 ... 10
6.3 Method 2 ... 10

**7 Determination of relative tinting strength and residual colour difference of coloured pigments** ... **11**
7.1 General ... 11
7.2 Principle ... 11
7.3 Procedure ... 11
7.3.1 General ... 11
7.3.2 Evaluation of absorption at the absorption maximum ... 11
7.3.3 Evaluation of the weighted $K/S$ sum ... 12
7.3.4 Evaluation by equalizing the tristimulus value, $Y$ ... 13
7.3.5 Evaluation by equalizing the smallest of the tristimulus values $X$, $Y$, and $Z$ ... 13
7.3.6 Evaluation by equalizing the depth of shade ... 14

**8 Determination of hiding power of pigmented media** ... **16**
8.1 General ... 16
8.2 Example for white or light-coloured paints with a contrast ratio of 0,98 as hiding power criterion ... 16

**9 Repeatability and reproducibility** ... **17**

**Annex A** (normative) **Tables of coefficients for calculating $a(\varphi)$ values (standard illuminant D65 and 10° standard observer)** ... **18**

**Annex B** (normative) **Tables of coefficients for calculating $a(\varphi)$ values (illuminant C and 2° standard observer)** ... **20**

**Bibliography** ... **22**
