Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 Design 7
4.1 Types and classes 7
4.2 Specific design requirements 8
4.3 Size designation 13

5 Requirements for background material, non-fluorescent material and combined performance material 14
5.1 Colour performance requirements of new material 14
5.2 Colour after Xenon test 14
5.3 Colour fastness of background material and all non-fluorescent material layers after test exposure 15
5.4 Dimensional change of background material and non-fluorescent material 15
5.5 Mechanical properties for background material and non-fluorescent material 16
5.6 Physiological performance -- Water vapour and thermal resistance 16

6 Photometric performance requirements for retroreflective material and combined performance material after physical exposure 16
6.1 Retroreflective performance requirements of new material 16
6.2 Retroreflective performance requirements after test exposure 17

7 Test methods 18
7.1 Sampling and conditioning 18
7.2 Determination of colour 18
7.3 Method of determination of retroreflective photometric performance 18
7.4 Retroreflection after exposure 19
7.5 Ageing 19

8 Marking 20

9 Information supplied by the manufacturer 20

Annex A (informative) Information concerning risk situations 21

Annex B (normative) Positioning of bands of retroreflective material on jackets for industrial wash test only 22

Annex C (normative) Method of measuring wet retroreflective performance 23

Annex D (informative) Guidelines for the design of high visibility garments 25

Bibliography 26

Annex ZA 27
