

ISO 6529:2013-02 (E)

Protective clothing - Protection against chemicals - Determination of resistance of protective clothing materials to permeation by liquids and gases

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms and definitions		2
4 Principle		5
5 Choice of analytical technique and collection medium		5
5.1 General		5
5.2 Gaseous collection media		5
5.3 Liquid collection media		6
5.4 Other collection media		6
6 Apparatus		6
7 System configuration		8
7.1 Open-loop		8
7.2 Closed-loop		9
8 Detection		11
8.1 Frequency of analysis		11
8.2 Analytical methods		11
9 Sampling		12
9.1 Sampling procedure		12
9.2 Preparation of test specimens		13
9.3 Measurement of test specimen thickness and mass		13
10 Procedure		13
10.1 Pre-screening		13
10.2 Calibration		13
10.3 Validation		14
10.4 Preparation of test apparatus		14
10.5 Method A -- Liquid chemicals with continuous contact		15
10.6 Method B -- Gaseous chemicals with continuous contact		16
10.7 Method C -- Liquid or gaseous chemical with intermittent contact		18
10.8 Calculation of results		19
10.9 Visual assessment of test specimen		22
10.10 Repeat tests		22
11 Report		24
Annex A (informative) Recommended list of chemicals for comparing permeation resistance of protective clothing materials		26
Annex B (informative) Sources of permeation test cells and permeation test cell parts		29

Annex C (informative) Designs and specifications of commonly-used permeation test cells	31
Annex D (informative) Suggested procedures for calibrating and measuring the sensitivity of permeation-test systems	35
Annex E (informative) Testing the permeation resistance of seams and closures	39
Annex F (normative) Default conditions for testing and reporting permeation resistance	42
Annex G (informative) Inter-laboratory and inter-sample variation	43
Bibliography	45
