

DIN EN 12841:2024-04 (E)

Personal fall protection equipment - Rope access systems - Rope adjustment devices

Contents	Page
European foreword	4
Introduction	5
1 Scope	6
2 Normative references	6
3 Terms and definitions	6
4 Requirements	9
4.1 General requirements for all Types	9
4.1.1 Anchor lines	9
4.1.2 Compatibility	9
4.1.3 Edge design	9
4.1.4 Corrosion resistance	9
4.1.5 Marking and information	9
4.2 Overview of the specific requirements for each type of rope adjustment devices	9
4.3 Specific requirements for Type A rope adjustment devices	10
4.3.1 Connecting elements	10
4.3.2 Free movement	10
4.3.3 Static strength	11
4.3.4 Dynamic performance	11
4.3.5 Dynamic strength and residual strength	11
4.4 Specific requirements for Type B rope adjustment devices	11
4.4.1 Free movement	11
4.4.2 Release prevention function	11
4.4.3 Minimum working performance	11
4.4.4 Dynamic strength and residual strength	12
4.5 Specific requirements for Type C rope adjustment devices	12
4.5.1 Hands-free locking element	12
4.5.2 Minimum working performance	12
4.5.3 Static strength	12
4.5.4 Dynamic strength and residual strength	12
4.5.5 Descent velocity and panic locking	12
4.5.6 Temperature rise	13
5 Test methods	13
5.1 Test apparatus	13
5.2 Conditioning and setup before testing	13
5.2.1 General conditioning	13
5.2.2 Conditioning to heat	13
5.2.3 Conditioning to wet	13
5.2.4 Conditioning to very cold	14
5.2.5 Conditioning to wet and cold	14
5.3 General tests	14
5.3.1 Test samples	14
5.3.2 Compatibility	14
5.3.3 Edge design	14
5.3.4 Corrosion resistance	15
5.4 Specific tests	15

5.4.1	Length of connecting elements	15
5.4.2	Movement test	15
5.4.3	Release prevention test for Type B rope adjustment devices	16
5.5	Static tests	17
5.5.1	Test samples	17
5.5.2	Minimum working performance test for Type B and Type C rope adjustment devices	17
5.5.3	Static strength test for Type A and Type C rope adjustment devices	18
5.6	Dynamic tests	19
5.6.1	Test samples	19
5.6.2	Dynamic performance for Type A rope adjustment devices	19
5.6.3	Dynamic strength and residual strength for Type A rope adjustment devices	20
5.6.4	Dynamic strength and residual strength for Type B and Type C rope adjustment devices	22
5.7	Descent test for Type C rope adjustment devices	25
5.7.1	General	25
5.7.2	Test samples	26
5.7.3	Test arrangement	26
5.7.4	Velocity, locking and temperature rise	26
6	Marking	27
7	Manufacturer's instructions and information	28
Annex A (informative) List of useful information		29
A.1	General	29
A.2	Maintenance of rope adjustment devices within the user's reach	29
A.3	Anticipation of emergency situations	29
A.4	Care when selecting anchor lines	29
Annex B (informative) Background and rationale about the changes between this Annex ZA (informative) Relationship between this European Standard and the essential requirements of Regulation 2016/425 aimed to be covered		38
