European foreword 4

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms and definitions 7

4 Classification, design, and type 7
4.1 Classification 7
4.2 Design 8
4.3 Type 8

5 General testing parameters 8

6 Requirements 8
6.1 Types and classifications 8
6.2 General and additional requirements 9
6.3 Thermal behaviour 14
6.3.1 Heat insulation of the sole complex 14
6.3.2 Radiant heat 14
6.3.3 Flame resistance 14
6.4 Compression resistance of the toe puff 14
6.5 Resistance to chemicals 15
6.6 Electrically insulating footwear 15
6.7 Outsole 15
6.7.1 Cleat design 15
6.7.2 Cleat height 15
6.7.3 Waist area 15

7 Test methods 16
7.1 Heat insulation of the sole complex 16
7.2 Radiant heat 16
7.3 Flame resistance 16
7.4 Compression resistance of the toe puff 20

8 Marking 20

9 Manufacturer's instructions and information 21
9.1 General 21

Annex A (normative) Customized footwear for firefighters (firefighter footwear adapted to fit an individual user) 23

Annex B (informative) Example of guidelines and considerations for performing a risk assessment 27

Annex C (normative) Assessment of the footwear by the laboratory during testing of thermal behaviour 31

Annex D (informative) Assessment of the footwear by the wearer 33

Annex E (informative) Contamination during use 34

Annex ZA (informative) Relationship between this European Standard and the essential requirements of Regulation (EU) 2016/425 aimed to be covered 36
