ISO 15538:2001-10 (E)

Protective clothing for firefighters - Laboratory test methods and performance requirements for protective clothing with a reflective outer surface

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 General clothing design 3
4.1 Garments 3
4.2 Hand protection 4
4.3 Foot protection 4

5 Sampling and pretreatment 4
5.1 Sampling 4
5.2 Pretreatment 4

6 Thermal requirements 4
6.1 Limited flame spread 4
6.2 Heat transfer (radiant heat) 4
6.3 Heat transfer (convective heat) 5
6.4 Contact heat 5
6.5 Heat resistance 5

7 Mechanical requirements 5
7.1 Dimensional change 5
7.2 Tensile strength 6
7.3 Tear strength 6
7.4 Seam strength 6

8 Other requirements 6
8.1 Water-penetration resistance 6
8.2 Surface wetting 6

9 Marking 7

10 Manufacturers' information 7

Annex A (normative) Mechanical pretreatment for metallized materials 8

Annex B (informative) Warning for flame engulfment 10

Annex C (informative) Guidelines for clothing design 11
