ISO 22514-8:2014-06 (E)

Statistical methods in process management - Capability and performance - Part 8: Machine performance of a multi-state production proc ess

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 2

3 Termsanddefinitions 2

4 Symbols and abbreviations 5

5 Preliminary technical analysis of the process 6
5.1 General 6
5.2 Identification of intrinsic factors 6
5.3 Determination of process-specific states 7

6 Preliminaryverificationsbeforecalculatingthemachineperformanceindices 7
6.1 Measurement system 7
6.2 Definition of the sampling plan for estimating global intrinsic dispersion 8

7 Estimation of global intrinsic dispersion and calculation of machine performance indices8 7.1 General 8
7.2 Verification on the absence of outliers in the set of made measurement results 9
7.3 Determination of the widths of local intrinsic dispersions 10
7.4 Determination of the locations of local intrinsic dispersions 11
7.5 Global intrinsic dispersion: type and estimation 12
7.6 Calculation of capability indices Pm and Pmk 14
7.7 Acceptance thresholds for the machine performance indices 15

Annex A (informative) States qualifying a processing process 16

Annex B (normative) Statistical tests 32
