## Statistical methods in process management - Capability and performance - Part 8: Machine performance of a multi-state production process

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	2
3	Terms and definitions .....	2
4	Symbols and abbreviations .....	5
5	Preliminary technical analysis of the process .....	6
5.1	General .....	6
5.2	Identification of intrinsic factors .....	6
5.3	Determination of process-specific states .....	7
6	Preliminary verifications before calculating the machine performance indices .....	7
6.1	Measurement system .....	7
6.2	Definition of the sampling plan for estimating global intrinsic dispersion .....	8
7	Estimation of global intrinsic dispersion and calculation of machine performance indices	
	7.1 General .....	8
7.2	Verification on the absence of outliers in the set of made measurement results .....	9
7.3	Determination of the widths of local intrinsic dispersions .....	10
7.4	Determination of the locations of local intrinsic dispersions .....	11
7.5	Global intrinsic dispersion: type and estimation .....	12
7.6	Calculation of capability indices $P_m$ and $P_{mk}$ .....	14
7.7	Acceptance thresholds for the machine performance indices .....	15
	Annex A (informative) States qualifying a processing process .....	16
	Annex B (normative) Statistical tests .....	32
	Bibliography .....	37
