

ISO 22514-8:2014-06 (E)

Statistical methods in process management - Capability and performance - Part 8: Machine performance of a multi-state production process

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	2
3 Terms and definitions	2
4 Symbols and abbreviations	5
5 Preliminary technical analysis of the process	6
5.1 General	6
5.2 Identification of intrinsic factors	6
5.3 Determination of process-specific states	7
6 Preliminary verifications before calculating the machine performance indices	7
6.1 Measurement system	7
6.2 Definition of the sampling plan for estimating global intrinsic dispersion	8
7 Estimation of global intrinsic dispersion and calculation of machine performance indices	8
7.1 General	8
7.2 Verification on the absence of outliers in the set of made measurement results	9
7.3 Determination of the widths of local intrinsic dispersions	10
7.4 Determination of the locations of local intrinsic dispersions	11
7.5 Global intrinsic dispersion: type and estimation	12
7.6 Calculation of capability indices P_m and P_{mk}	14
7.7 Acceptance thresholds for the machine performance indices	15
Annex A (informative) States qualifying a processing process	16
Annex B (normative) Statistical tests	32
Bibliography	37
