

ISO 28590:2017-10 (E)

Sampling procedures for inspection by attributes - Introduction to the ISO 2859 series of standards for sampling for in spection by attributes

Contents		Page
Foreword		iv
Introduction		vi
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 General introduction to acceptance inspection		2
4.1 Aim of sampling inspection		2
4.2 Acceptance sampling		2
4.3 Other inspection practices		2
4.3.1 General		2
4.3.2 Statistical sampling		3
4.3.3 Ad hoc sampling		3
4.3.4 100 % inspection		3
4.3.5 Other sampling practices		4
4.4 Concepts of AQL and LQ		4
5 The ISO 2859 series		4
5.1 ISO 2859-1, <i>Sampling schemes indexed by acceptance quality limit (AQL) for lot-by-lot inspection</i>		4
5.1.1 General		4
5.1.2 Application		4
5.2 ISO 2859-2, <i>Sampling plans indexed by limiting quality (LQ) for isolated lot inspection</i>		5
5.2.1 General		5
5.2.2 Application		6
5.3 ISO 2859-3, <i>Skip-lot sampling procedures</i>		7
5.3.1 General		7
5.3.2 Application		7
5.4 ISO 2859-4, <i>Procedures for assessment of declared quality levels</i>		8
5.4.1 General		8
5.4.2 Application		8
5.5 ISO 2859-5, <i>System of sequential sampling plans indexed by acceptance quality limit (AQL) for lot-by-lot inspection</i>		9
5.5.1 General		9
5.5.2 Application		9
Bibliography		11
