ISO 16355-1:2021 (E)

Application of statistical and related methods to new technology and product development process — Part 1: General principles and perspectives of quality function deployment (QFD)

Contents

		Foreword				
		Introduction				
1		Scope				
2		Norma	lormative references			
3		Terms and definitions				
4		Basic	Basic concepts of QFD			
	4.1 4.2 4.3 4.4		Theory and principles of QFD QFD use of the word of function Spirit of QFD Display of information			
5		Integration of QFD and product development methods				
	5.1 5.2 5.2.1 5.2.2	1	QFD support for product development methods Flow of product development with QFD Organization of the QFD flow Flow chart of product development with QFD			
6		Types of QFD projects				
	6.1 6.2		General Applicable methods and tools			
7		QFD te	eam membership			
	7.1 7.2 7.3 7.4		QFD uses cross-functional teams Core team membership Subject matter experts QFD team leadership			
8		QFD v	oices			
	8.1 8.2 8.2.2 8.2.3 8.2.4 8.2.5 8.2.6 8.2.7 8.2.8 8.2.1	1 2 3 4 5 5 6 7 7 3 9	Voice of business Voice of customer (VOC) or voice of stakeholder (VOS) Definition of customer or stakeholder Applicable methods and tools Marketing perspective and engineering perspective Applicable methods and tools Prioritize customers or stakeholders Applicable methods and tools What is contained in the voice of customer (VOC) or voice of stakeholder (VOS) Sources of VOC and VOS Applicable methods and tools Translating VOC/VOS into customer needs Applicable methods and tools			
9			uring information sets			
	9.1 9.2		General Applicable tools and methods			
10		Prioriti	ization			

	10.1 10.2	General Applicable tools and methods					
11	Quan	Quantification					
	11.1	General					
	11.2	Applicable tools and methods					
12	Trans	lation of one information set into another					
	12.1	General					
	12.1	Applicable tools and methods					
13	Trans	fer of prioritization and quantification from one information set into another					
		·					
	13.1 13.2	Transfer of prioritization Applicable tools and methods					
	13.3	Transfer of quantification					
	13.4	Applicable tools and methods					
	13.5	Transferring deployment sets by dimensions					
	13.5.1	General					
	13.5.2	Quality deployment					
	13.5.3	Applicable tools and methods					
	13.5.4	Technology deployment					
	13.5.5	Applicable tools and methods					
	13.5.6 13.5.7	Cost deployment Applicable tools and methods					
	13.5.7	Reliability deployment					
	13.5.9	Applicable tools and methods					
	13.5.10	Safety deployment					
	13.5.11	Security deployment (see ISO 16355-7)					
	13.5.11.1	Organizational information					
	13.5.11.2	Personal information					
	13.5.11.3	Systems					
	13.5.12	Lifestyle and emotional quality deployment					
	13.5.13 13.6	Applicable tools and methods Transferring deployment sets by levels					
	13.6.1	Function deployment					
	13.6.2	Applicable tools and methods					
	13.6.3	Parts deployment					
	13.6.4	Applicable tools and methods					
	13.6.5	Manufacturing and process deployments					
	13.6.6	Applicable tools and methods					
	13.6.7	Project work or task management					
14	Solution concept engineering						
	14.1	General					
	14.2	Applicable tools and methods					
15	Design optimization						
	15.1	Parameter design for robustness					
	15.2	Tolerance design					
	15.3	Applicable tools and methods					
16	Prototyping, testing, and validation						
	16.1	General					
	16.2	Applicable tools and methods					
17	Build	planning					
	17.1	General					
	17.2	Applicable tools and methods					
18	Build	start-up					
	18.1	General					
	18.2	Applicable tools and methods					
19	Build						

	19.1 19.2	_	General Applicable tools and methods			
20		Packaging design, logistics, channel management, consumer information, and operating instructions				
	20.1	G	Seneral Seneral			
	20.2	A	Applicable tools and methods			
	20.3	L	ogistics			
	20.4	N	Marketing claims			
21		Custom	er support			
	21.1	G	General			
	21.2	Α	Applicable tools and methods			
22		Customer satisfaction				
	22.1	G	Seneral			
	22.2		Applicable tools and methods			
23		Product end-of-life disposal, recycle, reuse, and other sustainability concerns				
	23.1		Seneral			
	23.1	_	Applicable tools and methods
