## Accuracy (trueness and precision) of measurement methods and results - Part 3: Intermediate precision and alternative designs for collaborative studies

---

<b>Contents</b>		<b>Page</b>
<b>Foreword</b> .....		<b>v</b>
<b>Introduction</b> .....		<b>vi</b>
<b>1 Scope</b> .....		<b>1</b>
<b>2 Normative references</b> .....		<b>2</b>
<b>3 Terms and definitions</b> .....		<b>2</b>
<b>4 Symbols</b> .....		<b>3</b>
<b>5 General requirements</b> .....		<b>4</b>
<b>6 Intermediate measures of the precision of a standard measurement method</b> .....		<b>5</b>
6.1 Factors and factor levels.....		5
6.1.1 Definitions and examples.....		5
6.1.2 Selection of factors of interest.....		6
6.1.3 Random and fixed effects.....		6
6.1.4 Statistical model.....		7
6.2 Within-laboratory study and analysis of intermediate precision measures.....		9
6.2.1 Simplest approach.....		9
6.2.2 Alternative method.....		10
6.2.3 Effect of the measurement conditions on the final quoted result.....		10
<b>7 Nested design</b> .....		<b>11</b>
7.1 Balanced fully-nested design.....		11
7.2 Staggered-nested design.....		12
7.3 Balanced partially-nested design.....		13
7.4 Orthogonal array design.....		14
<b>8 Design for heterogeneous material</b> .....		<b>16</b>
8.1 Applications of the design for a heterogeneous material.....		16
8.2 Layout of the design for a heterogeneous material.....		17
8.3 Statistical analysis.....		17
<b>9 Split-level design</b> .....		<b>17</b>
9.1 Applications of the split-level design.....		17
9.2 Layout of the split-level design.....		19
9.3 Statistical analysis.....		19
<b>10 Design across levels</b> .....		<b>19</b>
10.1 Applications of the design across levels.....		19
10.2 Layout of the design across levels.....		20
10.3 Statistical analysis.....		20
<b>11 Reliability of interlaboratory parameters</b> .....		<b>20</b>
11.1 Reliability of precision estimates.....		20
11.2 Reliability of estimates of the overall mean.....		21
11.2.1 General.....		21
11.2.2 Balanced fully-nested design (2 factors).....		21
11.2.3 Staggered nested design (2 factors).....		21
11.2.4 Balanced partially-nested design.....		21
11.2.5 Orthogonal array design.....		21
11.2.6 Split-level design.....		22

<b>Annex A (informative) Fully- and partially-nested designs</b> .....	<b>23</b>
<b>Annex B (informative) Analysis of variance for balanced fully-nested design</b> .....	<b>25</b>
<b>Annex C (informative) Analysis of variance for staggered design</b> .....	<b>30</b>
<b>Annex D (informative) Analysis of variance for the balanced partially-nested design (three factors)</b> .....	<b>38</b>
<b>Annex E (informative) Statistical model for an experiment with heterogeneous material</b> .....	<b>41</b>
<b>Annex F (informative) Analysis of variance for split-level design</b> .....	<b>42</b>
<b>Annex G (informative) Example for split-level design</b> .....	<b>44</b>
<b>Annex H (informative) Design across levels</b> .....	<b>47</b>
<b>Annex I (informative) Restricted maximum likelihood (REML)</b> .....	<b>48</b>
<b>Annex J (informative) Examples of the statistical analysis of intermediate precision experiment</b> .....	<b>49</b>
<b>Annex K (informative) Example for an analysis across levels</b> .....	<b>55</b>
<b>Bibliography</b> .....	<b>57</b>
