

# ISO 5725-1:2023-07 (E)

## Accuracy (trueness and precision) of measurement methods and results - Part 1: General principles and definitions

---

| <b>Contents</b>       |  | <b>Page</b> |
|-----------------------|--|-------------|
| Foreword .....        |  | iv          |
| Introduction .....    |  | v           |
| 1                     | Scope .....  | 1           |
| 2                     | Normative references .....   | 1           |
| 3                     | Terms and definitions .....  | 1           |
| 4                     | General principles and practices of accuracy experiments .....             | 6           |
| 4.1                   | Accuracy experiment .....  | 6           |
| 4.2                   | Standard measurement method .....  | 7           |
| 4.3                   | Requirements concerning test items .....                                   | 7           |
| 4.4                   | Conditions for evaluation of repeatability (short intervals of time) ..... | 7           |
| 4.5                   | Conditions for evaluation of trueness .....                                | 8           |
| 4.6                   | Participating laboratories .....   | 8           |
| 4.7                   | Influential factors (observation conditions) .....                         | 8           |
| 5                     | Statistical model .....  | 9           |
| 5.1                   | Basic model .....  | 9           |
| 5.1.1                 | General mean, $m$ .....  | 9           |
| 5.1.2                 | Laboratory component of bias: term $B$ .....                               | 10          |
| 5.1.3                 | Error term $e$ .....   | 10          |
| 5.2                   | Relationship between the basic model and the precision .....               | 11          |
| 5.3                   | Bias of the measurement method .....                                       | 11          |
| 5.4                   | Alternative models .....   | 11          |
| 6                     | Experimental design of an accuracy experiment .....                        | 12          |
| 6.1                   | Planning of an accuracy experiment .....                                   | 12          |
| 6.2                   | Standard measurement methods .....   | 12          |
| 6.3                   | Selection of laboratories for the accuracy experiment .....                | 12          |
| 6.4                   | Selection of test items to be used for an accuracy experiment .....        | 13          |
| 7                     | Utilization of accuracy data .....   | 14          |
| 7.1                   | Publication values of trueness and precision .....                         | 14          |
| 7.2                   | Practical applications of trueness and precision values .....              | 15          |
| 7.2.1                 | General .....  | 15          |
| 7.2.2                 | Checking the acceptability of test results .....                           | 15          |
| 7.2.3                 | Stability of test results within a laboratory .....                        | 16          |
| 7.2.4                 | Assessing the performance of a laboratory .....                            | 16          |
| 7.2.5                 | Comparing alternative measurement methods .....                            | 16          |
| 7.2.6                 | Uncertainty evaluation .....   | 16          |
| Annex A (informative) | Symbols and abbreviations used in ISO 5725 (all parts) .....               | 17          |
| Bibliography .....    |  | 19          |
