ISO 24108-1:2025-10 (E)

Grid square statistics and their applications - Part 1: Fundamental principle of grid square statistics

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Grid square statistics 3
4.1 Basic concepts of grid square statistics 3
4.2 Categorical data and quantitative data 4
4.2.1 General 4
4.2.2 Categorical data 4
4.2.3 For quantitative data 4

5 Production process of grid square statistics 5
5.1 General 5
5.2 Method of allocating from microdata 6
5.2.1 Using census data 6
5.2.2 Using sample data 7
5.2.3 Using register data 7
5.3 Method of allocating from disaggregated data 7
5.4 Method of allocating from both microdata and disaggregated data 8

6 Conversion between different grid square reference systems 8
6.1 General 8
6.2 Method of conversion 9
6.2.1 Conversion method based on grid intersection 9
6.2.2 Conversion method based on a point approximation 10

Annex A (informative) Japanese national grid square code 11

Annex B (informative) World grid square code 18

Annex C (informative) Outline of the European reference grid: ETRS89-LAEA (INSPIRE) 24

Annex D (informative) Potential applications 25

Bibliography 27
