ISO 22514-7:2026-09 (E)

Statistical methods in process management - Capability and performance - Part 7: Capability of measurement processes

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols and abbreviated terms 6
4.1 Symbols 6
4.2 Abbreviated terms 9

5 Basic principles 9
5.1 General 9
5.2 Resolution 11
5.3 Maximum permissible error known and used 11
5.3.1 General 11
5.3.2 Maximum permissible deviation of the measuring system, MPE 11
5.4 Capability and performance limits for a measuring system and measurement process 12

6 Implementation 12
6.1 General 12
6.2 Factors that influence the measurement process 12
6.2.1 General 12
6.2.2 Uncertainty components that belong to the measuring system 12
6.2.3 Additional uncertainty components belonging to the measurement process 15

7 Studies for calculating the uncertainty components 17
7.1 Measuring system 17
7.1.1 General 17
7.1.2 Repeatability and bias based on one reference standard 17
7.1.3 Standard uncertainty from the linearity deviation 18

8 Calculation of combined uncertainty 21
8.1 General 21
8.2 Calculation of expanded uncertainty 23

9 Capability 24
9.1 Performance ratios 24
9.1.1 General 24
9.1.2 Performance ratio of the measuring system 24
9.1.3 Performance ratio of the measurement process 24
9.2 Capability indices 24
9.3 Capability of a measurement process with one-sided specifications 25

10 Capability of the measurement process compared to the capability of the production process 29
10.1 Relation between observed process capability and measurement capability ratios 29
10.2 Relation between observed process capability and measurement capability 30

11 Ongoing review of the measurement process stability 31
11.1 Ongoing review of the stability 31

Annex A (informative) Examples 32

Annex B (informative) Statistical methods used 38

Annex C (informative) Example of measurement capability calculation 43

Bibliography 51
