|---|---|-------------|
| Foreword .....  |   | iv          |
| Introduction .....  |   | v           |
| 1   | Scope .....   | 1           |
| 2   | Normative references .....                            | 1           |
| 3   | Terms, definitions and symbols .....                  | 2           |
| 3.1   | Terms and definitions .....                           | 2           |
| 3.2   | Symbols .....   | 7           |
| 4   | General requirements .....                            | 8           |
| 4.1   | Product requirements .....                            | 8           |
| 4.2   | Acceptance by tables .....                            | 8           |
| 4.3   | Acceptance by supplier-proposed provisions .....      | 9           |
| 4.4   | Critical characteristics .....                        | 11          |
| 4.5   | Special reservations for critical nonconformity ..... | 11          |
| 5   | Detailed requirements .....                           | 11          |
| 5.1   | Acceptance by tables .....                            | 11          |
| 5.2   | Acceptance by supplier-proposed provisions .....      | 19          |
| Annex A (informative) Why accept-zero? .....  |   | 22          |
| Annex B (informative) Disposition of lot when customer acceptance is withheld ..... |   | 23          |
| Annex C (informative) Graphical representation of switching rules .....             |   | 25          |
| Annex D (normative) Examples of use of sampling systems .....                       |   | 28          |
| Annex E (informative) Summary tables .....  |   | 34          |
| Bibliography .....  |   | 41          |
