## Statistical methods for use in proficiency testing by interlaboratory comparisons

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
0	Introduction .....	vi
0.1	The aims of proficiency testing .....	vi
0.2	ISO/IEC Guide 43 .....	vi
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Statistical guidelines for the design and interpretation of proficiency tests .....	2
4.1	Action and warning signals .....	2
4.2	Guidelines for limiting the uncertainty of the assigned value .....	3
4.3	Guidelines for choosing the number of replicate measurements .....	3
4.4	Homogeneity and stability of samples .....	4
4.5	Operationally defined measurement methods .....	4
4.6	Reporting of data .....	5
4.7	Period of validity of the results of proficiency tests .....	5
5	Determination of the assigned value and its standard uncertainty .....	5
5.1	Choice of method of determining the assigned value .....	5
5.2	Formulation .....	5
5.3	Certified reference values .....	6
5.4	Reference values .....	7
5.5	Consensus values from expert laboratories .....	8
5.6	Consensus value from participants .....	9
5.7	Comparison of the assigned value .....	14
5.8	Missing values .....	14
6	Determining the standard deviation for proficiency assessment .....	15
6.1	Choice of method .....	15
6.2	Prescribed value .....	15
6.3	By perception .....	15
6.4	From a general model .....	17
6.5	From the results of a precision experiment .....	17
6.6	From data obtained in a round of a proficiency testing scheme .....	18
6.7	Comparison of precision values derived from a proficiency test with established values .....	18
7	Calculation of performance statistics .....	18
7.1	Estimates of laboratory bias .....	18
7.2	Percentage differences .....	22
7.3	Ranks and percentage ranks .....	24
7.4	z-scores .....	25
7.5	En numbers .....	27
7.6	z-scores .....	28
7.7	Zeta-scores ( ) .....	29
7.8	Ez score .....	30
7.9	An example of the analysis of data when uncertainties are reported .....	30
7.10	Combined performance scores .....	35

<b>8</b>	<b>Graphical methods for combining performance scores for several measurands from one round of a proficiency test .....</b>	<b>36</b>
8.1	Application .....	36
8.2	Histograms of performance scores .....	36
8.3	Bar-plots of standardized laboratory biases .....	37
8.4	Bar-plots of standardized repeatability measurements .....	38
8.5	Youden Plot .....	38
8.6	Plots of repeatability standard deviations .....	45
8.7	Split samples .....	47
<b>9</b>	<b>Graphical methods for combining performance scores over several rounds of a proficiency testing scheme .....</b>	<b>52</b>
9.1	Applications .....	52
9.2	Shewhart control chart for z-scores .....	52
9.3	Cusum control chart for z-scores .....	55
9.4	Plots of standardized laboratory biases against laboratory averages .....	56
9.5	Dot plot .....	57
<b>Annex A (normative) Symbols .....</b>	<b>59</b>	
<b>Annex B (normative) Homogeneity and stability checks of samples .....</b>	<b>60</b>	
<b>Annex C (normative) Robust analysis .....</b>	<b>64</b>	
<b>Bibliography .....</b>	<b>66</b>
