DIN EN 16222:2012-12 (E)

Cathodic protection of ship hulls

Contents

Page

Foreword 4

Introduction 5

1 Scope 6
1.1 General 6
1.2 Structures 6
1.3 Materials 6
1.4 Environment 6

2 Normative references 6

3 Terms and definitions 7

4 Competence of personnel 7

5 Design basis 8
5.1 General 8
5.2 Cathodic protection criteria 8
5.3 Design process 9
5.4 Design parameters 10
5.5 Current demand 10
5.6 Cathodic protection systems 13
5.7 Electrical continuity 14
5.8 Fitting out period 14

6 Impressed current system 14
6.1 Objectives 14
6.2 Design considerations 14
6.3 Equipment considerations 15

7 Galvanic anodes system 19
7.1 Objectives 19
7.2 Design considerations 19
7.3 Anode materials 19
7.4 Factors determining the anode current output and operating life 20
7.5 Location of anodes 20

8 Commissioning, Operation and Maintenance 21
8.1 Objectives 21
8.2 Measurement Procedures 21
8.3 Commissioning: Galvanic Systems 21
8.4 Commissioning: Impressed Current Systems 22
8.5 Operation and maintenance 23
8.6 Dry-docking period 24

9 The protection of ships' hulls during fitting out and when laid up 25
9.1 Fitting out period 25
9.2 Lay up period 25

10 Documentation 25
10.1 Objectives 25

10.2 Impressed current system 26
10.3 Galvanic anode systems 26

Annex A (informative) Impressed current system for hulls of ships based on two cathodic protection zones 28

Annex B (informative) Guidance on design current values for cathodic protection of hulls of ships 29

B.1 Typical design current densities for the cathodic protection of bare steel (Jb) 29
B.2 Coating breakdown of conventional paint systems (fc) 29
B.3 Typical current densities for global approach of the cathodic protection of coated ships (Jg) 30

Annex C (informative) Anode resistance, current and life duration formulae 31

C.1 Anode resistance formulae 31
C.2 Calculation of the anode resistance at the end of life 32
C.3 Electrolyte resistivity 33
C.4 Galvanic anode current output 35
C.5 Anode life 35
C.6 Minimum Net Weight Requirement 35

Annex D (informative) Electrical bonding systems 37

Annex E (informative) Monitoring of electrical bonding of a ship's propeller 39

Annex F (informative) Impressed current system for ships based on an aft (stern) system only 40

Annex G (informative) Location of galvanic anodes in the stern area 41

Annex H (informative) Electrochemical characteristics of impressed current anodes 42

Annex I (informative) Cofferdam arrangements 43

Annex J (informative) Cathodic protection of a moored ship using suspended galvanic anodes 45

Bibliography 46
