

DIN EN 16222:2012-12 (E)

Cathodic protection of ship hulls

Contents		Page
Foreword		4
Introduction		5
1	Scope	6
1.1	General	6
1.2	Structures	6
1.3	Materials	6
1.4	Environment	6
2	Normative references	6
3	Terms and definitions	7
4	Competence of personnel	7
5	Design basis	8
5.1	General	8
5.2	Cathodic protection criteria	8
5.3	Design process	9
5.4	Design parameters	10
5.5	Current demand	10
5.6	Cathodic protection systems	13
5.7	Electrical continuity	14
5.8	Fitting out period	14
6	Impressed current system	14
6.1	Objectives	14
6.2	Design considerations	14
6.3	Equipment considerations	15
7	Galvanic anodes system	19
7.1	Objectives	19
7.2	Design considerations	19
7.3	Anode materials	19
7.4	Factors determining the anode current output and operating life	20
7.5	Location of anodes	20
8	Commissioning, Operation and Maintenance	21
8.1	Objectives	21
8.2	Measurement Procedures	21
8.3	Commissioning: Galvanic Systems	21
8.4	Commissioning: Impressed Current Systems	22
8.5	Operation and maintenance	23
8.6	Dry-docking period	24
9	The protection of ships' hulls during fitting out and when laid up	25
9.1	Fitting out period	25
9.2	Lay up period	25
10	Documentation	25
10.1	Objectives	25

10.2	Impressed current system	26
10.3	Galvanic anode systems	26
Annex A (informative) Impressed current system for hulls of ships based on two cathodic protection zones		28
Annex B (informative) Guidance on design current values for cathodic protection of hulls of ships		29
B.1	Typical design current densities for the cathodic protection of bare steel (Jb)	29
B.2	Coating breakdown of conventional paint systems (fc)	29
B.3	Typical current densities for global approach of the cathodic protection of coated ships (Jg)	30
Annex C (informative) Anode resistance, current and life duration formulae		31
C.1	Anode resistance formulae	31
C.2	Calculation of the anode resistance at the end of life	32
C.3	Electrolyte resistivity	33
C.4	Galvanic anode current output	35
C.5	Anode life	35
C.6	Minimum Net Weight Requirement	35
Annex D (informative) Electrical bonding systems		37
Annex E (informative) Monitoring of electrical bonding of a ship's propeller		39
Annex F (informative) Impressed current system for ships based on an aft (stern) system only		40
Annex G (informative) Location of galvanic anodes in the stern area		41
Annex H (informative) Electrochemical characteristics of impressed current anodes		42
Annex I (informative) Cofferdam arrangements		43
Annex J (informative) Cathodic protection of a moored ship using suspended galvanic anodes		45
Bibliography		46
