## Small craft - Hull construction and scantlings - Part 9: Sailing craft appendages

---

<b>Contents</b>	<b>Page</b>
Foreword .....	iv
Introduction .....	v
1 Scope .....	1
2 Normative references .....	1
3 Terms and definitions .....	2
4 Symbols .....	3
5 Design stresses .....	4
6 Structural components to be assessed .....	6
7 Load cases .....	6
7.1 General .....	6
7.2 Load case 1 -- Fixed keel at 90° knockdown .....	7
7.3 Load case 2 -- Canted keel steady load at 30° heel with dynamic overload factor .....	8
7.4 Load case 3 -- Keelboat vertical pounding .....	9
7.5 Load case 4 -- Keelboat longitudinal impact .....	10
7.6 Load case 5 -- Centreboard on capsize recoverable dinghies .....	11
7.7 Load case 6 -- Centreboard or dagger board upwind .....	11
7.8 Other load cases .....	12
8 Computational methods .....	15
8.1 General .....	15
8.2 General guidance for assessment by 3D numerical procedures .....	15
8.3 Assessment by strength of materials/non-computational-based methods .....	16
9 Compliance .....	16
Annex A (normative) Application declaration .....	18
Annex B (informative) Information on metal for appendages and fasteners and "established practice" for fastening and welding .....	19
Annex C (informative) "Established practice" structural arrangement for ballast keels .....	30
Annex D (informative) "Established practice" calculation of keel fin strength (fixed or canting) and fixed ballast keel connected by bolts .....	44
Annex E (informative) Geometrical properties of some typical appendage foil shapes .....	61
Annex F (informative) Simplified fatigue strength assessment .....	64
Bibliography .....	76
