

ISO 12215-9:2012-06 (E)

Small craft - Hull construction and scantlings - Part 9: Sailing craft appendages

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Symbols	3
5	Design stresses	4
6	Structural components to be assessed	6
7	Load cases	6
7.1	General	6
7.2	Load case 1 -- Fixed keel at 90° knockdown	7
7.3	Load case 2 -- Canted keel steady load at 30° heel with dynamic overload factor	8
7.4	Load case 3 -- Keelboat vertical pounding	9
7.5	Load case 4 -- Keelboat longitudinal impact	10
7.6	Load case 5 -- Centreboard on capsize recoverable dinghies	11
7.7	Load case 6 -- Centreboard or dagger board upwind	11
7.8	Other load cases	12
8	Computational methods	15
8.1	General	15
8.2	General guidance for assessment by 3D numerical procedures	15
8.3	Assessment by strength of materials/non-computational-based methods	16
9	Compliance	16
Annex A (normative) Application declaration		18
Annex B (informative) Information on metal for appendages and fasteners and "established practice" for fastening and welding		19
Annex C (informative) "Established practice" structural arrangement for ballast keels		30
Annex D (informative) "Established practice" calculation of keel fin strength (fixed or canting) and fixed ballast keel connected by bolts		44
Annex E (informative) Geometrical properties of some typical appendage foil shapes		61
Annex F (informative) Simplified fatigue strength assessment		64
Bibliography		76
