## Ships and marine technology - Floating pneumatic rubber fenders - Part 2: Low pressure

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Classification .....	3
4.1	Low-pressure fender types .....	3
4.2	Initial internal pressure .....	3
5	Ordering information .....	3
5.1	Information to the manufacturer .....	3
5.2	Information from the manufacturer .....	3
6	Low-pressure fender requirements .....	3
6.1	Clamped end fender requirements .....	3
6.2	Moulded end fender requirements .....	4
6.3	Size requirements .....	5
7	Performance .....	5
7.1	Specification of performance .....	5
7.2	Performance curves .....	5
7.3	Fender performance .....	5
8	Performance confirmation of prototype fender test .....	5
8.1	General .....	5
8.2	Performance test, parallel compression test .....	6
8.3	Angular compression test .....	6
8.4	Durability test .....	6
8.5	Compression recovery test .....	7
8.6	Puncture resistance test .....	7
8.7	Recording condition .....	7
9	Test and inspection for commercial fenders .....	7
9.1	General .....	7
9.2	Test of the fender body material .....	7
9.3	Dimensional inspection .....	8
9.4	Air leakage test .....	8
9.5	Hydrostatic pressure test .....	8
10	Marking .....	9
11	Documentation .....	9
12	Inspection and evaluation by a qualified independent inspection service .....	10
Bibliography .....		14
