

ISO 17357-2:2014-01 (E)

Ships and marine technology - Floating pneumatic rubber fenders - Part 2: Low pressure

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Classification	3
4.1	Low-pressure fender types	3
4.2	Initial internal pressure	3
5	Ordering information	3
5.1	Information to the manufacturer	3
5.2	Information from the manufacturer	3
6	Low-pressure fender requirements	3
6.1	Clamped end fender requirements	3
6.2	Moulded end fender requirements	4
6.3	Size requirements	5
7	Performance	5
7.1	Specification of performance	5
7.2	Performance curves	5
7.3	Fender performance	5
8	Performance confirmation of prototype fender test	5
8.1	General	5
8.2	Performance test, parallel compression test	6
8.3	Angular compression test	6
8.4	Durability test	6
8.5	Compression recovery test	7
8.6	Puncture resistance test	7
8.7	Recording condition	7
9	Test and inspection for commercial fenders	7
9.1	General	7
9.2	Test of the fender body material	7
9.3	Dimensional inspection	8
9.4	Air leakage test	8
9.5	Hydrostatic pressure test	8
10	Marking	9
11	Documentation	9
12	Inspection and evaluation by a qualified independent inspection service	10
