|--------------------|---|-------------|
| Foreword .....     |   | v           |
| Introduction ..... |   | vi          |
| <b>1</b>           | <b>Scope .....</b>                                      | <b>1</b>    |
| <b>2</b>           | <b>Normative references .....</b>                       | <b>1</b>    |
| <b>3</b>           | <b>Terms and definitions .....</b>                      | <b>2</b>    |
| <b>4</b>           | <b>Requirements .....</b>                               | <b>3</b>    |
| 4.1                | General .....   | 3           |
| 4.2                | Functionality .....                                     | 3           |
| 4.3                | Information .....                                       | 3           |
| 4.3.1              | Actual heel angle and roll amplitude .....              | 3           |
| 4.3.2              | Roll period .....                                       | 3           |
| 4.3.3              | Roll peak hold value .....                              | 3           |
| 4.4                | Display .....   | 4           |
| 4.5                | Alerts .....  | 4           |
| 4.5.1              | Operational alerts .....                                | 5           |
| 4.5.2              | Functional alerts .....                                 | 5           |
| 4.6                | Interface .....   | 6           |
| 4.7                | Power supply .....                                      | 6           |
| <b>5</b>           | <b>Accuracy .....</b>                                   | <b>6</b>    |
| 5.1                | Actual heel angle, roll amplitude and roll period ..... | 6           |
| 5.2                | Acceleration condition .....                            | 6           |
| <b>6</b>           | <b>Test methods and required results .....</b>          | <b>6</b>    |
| 6.1                | General .....   | 6           |
| 6.2                | Static actual heel angle test .....                     | 7           |
| 6.2.1              | Method of testing and required results .....            | 7           |
| 6.3                | Dynamic actual heel angle test .....                    | 7           |
| 6.3.1              | Method of testing and required results .....            | 7           |
| 6.4                | Long-term actual heel angle test .....                  | 7           |
| 6.4.1              | Method of testing and required results .....            | 7           |
| 6.5                | Roll period test .....                                  | 8           |
| 6.5.1              | Method of testing and required results .....            | 8           |
| 6.6                | Connections to other equipment test .....               | 8           |
| 6.6.1              | Method of testing and required results .....            | 8           |
| 6.7                | Display test .....                                      | 8           |
| 6.7.1              | Method of testing and required results .....            | 8           |
| 6.8                | Operational alert test .....                            | 10          |
| 6.8.1              | Method of testing and required results .....            | 10          |
| 6.9                | Functional alert test .....                             | 11          |
| 6.9.1              | Method of testing and required results .....            | 11          |
| 6.10               | Roll peak hold value test .....                         | 11          |
| 6.10.1             | Method of testing and required results .....            | 11          |
| 6.11               | Reset function of roll peak hold value test .....       | 11          |
| 6.11.1             | Method of testing and required results .....            | 12          |
| 6.12               | Power supply test .....                                 | 12          |

|   |   |           |
|---|---|-----------|
| 7 | Installation position .....   | 12        |
| 8 | Information .....   | 12        |
|   | <b>Annex A (informative) Relationship between transverse metacentric stability and measured natural roll period of ships in waves .....</b> | <b>13</b> |
|   | <b>Annex B (informative) Test facility type test methodology .....</b>  | <b>16</b> |
|   | <b>Annex C (informative) IEC 611621 interface for VDR and other systems .....</b>   | <b>17</b> |
|   | <b>Bibliography .....</b>   | <b>19</b> |
