## Ships and marine technology - Cathodic protection of ships

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
<b>1</b>	<b>Scope .....</b>	<b>1</b>
<b>2</b>	<b>Normative references .....</b>	<b>1</b>
<b>3</b>	<b>Terms and definitions .....</b>	<b>2</b>
<b>4</b>	<b>Competence of personnel .....</b>	<b>3</b>
<b>5</b>	<b>Design basis .....</b>	<b>3</b>
5.1	General .....	3
5.2	Cathodic protection criteria .....	4
5.3	Design process .....	5
5.4	Design considerations .....	6
5.4.1	Cathodic protection zones of ship hull (external) .....	6
5.4.2	Internal cathodic protection zones .....	6
5.4.3	Component characteristics .....	7
5.4.4	Service conditions .....	7
5.5	Current demand .....	7
5.5.1	General .....	7
5.5.2	Design current density for bare steel .....	8
5.5.3	Design current density for coated steel .....	8
5.5.4	Current demand .....	9
5.6	Cathodic protection systems .....	11
5.7	Electrical continuity .....	12
5.8	Fitting out period .....	12
<b>6</b>	<b>Impressed current system .....</b>	<b>12</b>
6.1	Objectives .....	12
6.2	Design considerations .....	12
6.3	Equipment considerations .....	13
6.3.1	Power source, monitoring and control systems .....	13
6.3.2	Anodes .....	15
6.3.3	Dielectric shields .....	16
6.3.4	Permanent reference and measurement electrodes .....	16
6.3.5	Cables and terminations .....	16
6.3.6	Cofferdams .....	17
<b>7</b>	<b>Galvanic anode systems .....</b>	<b>17</b>
7.1	Objectives .....	17
7.2	Design considerations .....	18
7.3	Anode materials .....	18
7.4	Factors determining the anode current output and operating life .....	19
7.5	Location of anodes .....	19
7.5.1	External hull surfaces .....	19
7.5.2	Internal surfaces .....	20
<b>8</b>	<b>Commissioning, operation and maintenance .....</b>	<b>23</b>
8.1	Objectives .....	23

8.2	Measurement procedures .....	23
8.3	Commissioning: Galvanic systems .....	24
8.4	Commissioning: Impressed current systems .....	24
8.4.1	Visual inspection .....	24
8.4.2	Pre-energizing measurements .....	25
8.4.3	Initial energizing .....	25
8.4.4	Performance assessment .....	25
8.5	Operation and maintenance .....	26
8.5.1	General .....	26
8.5.2	Galvanic anode systems .....	26
8.5.3	Impressed current systems .....	26
8.5.4	Interaction with adjacent structures .....	27
8.6	Dry-docking period .....	27
9	The protection of ships' hulls during fitting out and when laid up .....	28
9.1	Fitting out period .....	28
9.2	Lay-up period .....	28
10	Documentation .....	28
10.1	Objectives .....	28
10.2	Galvanic anode systems .....	29
10.3	Impressed current system .....	29
Annex A (informative) Impressed current system for external hulls of ships based on two cathodic protection zones .....		31
Annex B (informative) Guidance on design current density values for cathodic protection of ship's hulls and tanks .....		32
Annex C (informative) Anode resistance, current and life duration formulae .....		34
Annex D (informative) Electrical bonding systems .....		39
Annex E (informative) Monitoring of electrical bonding of a ship's propeller .....		41
Annex F (informative) Impressed current system for ships based on an aft (stern) system only .....		42
Annex G (informative) Location of galvanic anodes in the stern area .....		43
Annex H (informative) Electrochemical characteristics of impressed current anodes .....		44
Annex I (informative) Cofferdam arrangements .....		46
Annex J (informative) Cathodic protection of a moored ship using suspended galvanic anodes .....		49
Annex K (informative) Anode/cathode separation (dielectric shield) calculations .....		51
Annex L (Informative) Galvanic anode specifications .....		52
Annex M (informative) Use of portable coupons .....		55
Bibliography .....		56
