|-------|--|
|       | Foreword                                       |
|       | Introduction                                   |
| 1     | Scope  |
| 2     | Normative references                           |
| 3     | Terms and definitions                          |
| 4     | Principles of the measurement                  |
| 5     | Components of the device                       |
| 5.1   | General  |
| 5.2   | Shaft ring                                     |
| 5.3   | Sensor   |
| 5.4   | Transmitting/receiving component               |
| 5.5   | Peripherals                                    |
| 6     | Calculation of the shaft power                 |
| 6.1   | Shaft torque                                   |
| 6.2   | Shaft power                                    |
| 7     | Factors for determining the measuring accuracy |
| 7.1   | General  |
| 7.2   | Sensor sensitivity                             |
| 7.3   | G-modulus                                      |
| 7.4   | Zero adjustment                                |
| 7.4.1 | Zero Point                                     |
| 7.4.2 | Procedure for the zero adjustment              |
| 8     | On-board documentation for the device          |
