

ISO 21131:2019 (E)

Ships and marine technology — Marine cranes — Noise limits and measuring method

Contents

| | |
|-------|--|
| | Foreword |
| 1 | Scope |
| 2 | Normative references |
| 3 | Terms and definitions |
| 4 | Area classification |
| 5 | Noise level limits and personnel noise exposure duration |
| 6 | Measurement methods |
| 6.1 | Measurement equipment |
| 6.1.1 | General |
| 6.1.2 | Sound level meter |
| 6.2 | Measurement condition |
| 6.3 | Measurement position |
| 7 | Measurement uncertainty and report |
| 7.1 | Measurement uncertainty |
| 7.2 | Measurement report |
| 8 | Protection from noise |
| 8.1 | General |
| 8.2 | Protection from noise for the operating console |
| 8.3 | Protection from noise for the engine room |
| 9 | Noise warning panels |
