

ISO 23807:2023-03 (E)

Ships and marine technology - General requirements for the asynchronous time-insensitive ship-shore data transmission

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	2
5	General requirements	3
5.1	General	3
5.2	Encryption	4
5.3	Compression	4
5.4	Deduplication	4
5.5	Distribution	5
5.6	Recovery	5
6	Data transport agent -- vessel side interface	5
6.1	General	5
6.2	Transportation folders	5
6.3	File move and sync	5
6.3.1	Moving files	5
6.3.2	Synchronizing folders	5
6.4	Server message block	5
6.5	Asynchronous message service	6
6.6	API	6
7	Data transport agent -- shore side interface	6
8	Requirements for asynchronous data management agent	6
8.1	General	6
8.2	Size restrictions	6
8.3	Prioritization of data	7
8.4	Carrier status	7
8.5	On-demand data request	7
8.6	Delayed transmission	7
8.7	Resume on interrupt	7
8.8	Monitoring	7
9	Requirements for security of data transmission	8
9.1	General	8
9.2	Transport security	8
9.3	Data security	8
Annex A (informative)	Correlation chart	10
Annex B (informative)	Functions of asynchronous data management agent	11
Annex C (informative)	HTTP file input and output protocol used on the data transport agent	13
