ISO 16425:2024-01 (E)

Ships and marine technology - Specifications for the installation of ship communication networks for shipboard equipment and systems

Contents

Page

Foreword ..... **vi**

Introduction ..... **viii**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **2**

4 Abbreviated terms **6**

5 Network system architecture **7**
5.1 Scope of networks system architecture 7
5.2 Controlled network requirements 9
5.3 Network system design 9
5.3.1 General 9
5.3.2 Network system separation 10
5.3.3 Network division 10
5.3.4 Traffic division 10
5.3.5 Redundancy 11
5.3.6 Cyber security 11
5.4 Roles and management 11
5.4.1 General 11
5.4.2 Ship owner 11
5.4.3 System integrator 11
5.4.4 Ship operator 11
5.4.5 Manufacturer 12
5.4.6 After-sales-service provider 12

6 Organized necessary function **12**
6.1 General 12
6.2 Necessary information 12

7 Operation plan design **13**
7.1 General 13
7.2 Objectives for managing shipboard network operations 13
7.3 Items to manage 15
7.3.1 Items to manage devices and cables to be installed 15
7.3.2 Items to monitor and details 15
7.3.3 Details of maintenance 15
7.3.4 Back-ups and log management 15
7.3.5 Operation of reports 15
7.3.6 Service management 16

8 Understanding the equipment to be installed **16**
8.1 Understanding the equipment 16
8.1.1 General 16
8.1.2 Inventory lists 16
8.2 Requirements for the 16425-Network device and 16425-equipment installed in the shipboard network 16
8.2.1 General cyber security requirements for 16425-Network devices and 16425-equipment 16
8.2.2 Network interface for 16425-Network equipment and 16425-Network device 17
8.2.3 Requirements for 16425-Network nodes 17
8.2.4 Requirements for 16425-Network devices 18

8.3 Protocol and traffic ... 23
8.3.1 General ... 23
8.3.2 Protocol ... 23
8.3.3 Traffic ... 23
8.3.4 IP address ... 23
8.3.5 MAC address ... 23
8.4 Cable ... 23
8.4.1 General ... 23
8.4.2 Cable specification ... 23
8.4.3 Cable earth method ... 23

9 Network design ... 24
9.1 General ... 24
9.2 Concept of shipboard network system ... 24
9.2.1 General arrangement ... 24
9.2.2 Channel ... 24
9.2.3 Permanent ink ... 24
9.2.4 Code ... 25
9.2.5 Extender connector ... 25
9.2.6 Telecommunications outlet ... 25
9.3 Design standard ... 25
9.3.1 Category of cables and codes ... 25
9.3.2 Plug connection method ... 25
9.3.3 Specifications for naming cable ... 25
9.3.4 Model number of cable, code, plug, jack and crimping tools to be used ... 25
9.4 Physical design ... 25
9.4.1 Selection of 16425-Network equipment ... 25
9.4.2 Cabling ... 27
9.4.3 Separation of collision domain ... 28
9.4.4 Setting of interfaces ... 28
9.4.5 Installation ... 28
9.5 Logical design ... 28
9.5.1 General ... 28
9.5.2 Isolation of network ... 28
9.5.3 Broadcast domain ... 29
9.6 Reliability design ... 29
9.6.1 General ... 29
9.6.2 Redundancy ... 29
9.6.3 Monitoring of shipboard networks ... 29
9.6.4 Load design ... 30
9.7 Wireless network design ... 30
9.7.1 General ... 30
9.7.2 Frequency requirement ... 30
9.7.3 Frequency interference ... 30
9.7.4 Load design ... 31
9.7.5 Installation design ... 31
9.7.6 Wireless network security design ... 31
9.7.7 Power supply and voltage ... 31
9.7.8 Pre-survey ... 31
9.7.9 Security design ... 32
9.8 Documentation ... 32
9.8.1 Network design document ... 32
9.8.2 List of equipment (device inventory) ... 32
9.8.3 Schematic diagram ... 32
9.8.4 Logical topology diagram ... 33
9.8.5 List of virtual networks ... 33
9.8.6 List of interfaces between (virtual) networks ... 33
9.9 Risk assessment (design phase) ... 33

10 16425-Network device and cable installation ... 33
10.1 General ... 33
10.2 Installation procedure ... 34
10.2.1 16425-Network device ... 34
10.2.2 Network cable ... 34
10.2.3 Cable end termination ... 36

10.3 Installation confirmation 37
10.3.1 Conductivity confirmation 37
10.3.2 Wire map confirmation 37
10.3.3 Length confirmation 37
10.3.4 Insertion loss test 37
10.3.5 Near end crosstalk loss 37
10.3.6 Power meter checking 38
10.3.7 Cable ID 38
10.3.8 End termination 38
10.4 16425-Wireless-Gateway installation procedures 38
10.4.1 Environmental resistance 38

11 Network cable installation and wireless installation test and inspection 38
11.1 Cable installation 38
11.2 16425-Wireless Gateway installation confirmation 44

12 Network operation 45
12.1 General 45
12.2 Identify vulnerabilities 45
12.2.1 Operation policy and procedure 45
12.2.2 Inventory and assessment 45
12.3 Develop protection and detection measures 46
12.3.1 Policy and procedure 46
12.3.2 Access control 46
12.4 Response and recovery 46
12.4.1 Contingency plan 46
12.4.2 Response to shipboard network incidents 46
12.4.3 Recovery from shipboard network incidents 46
12.5 Maintenance 47
12.5.1 Maintenance policy and procedure 47
12.5.2 Maintenance document and report 47

13 Network cyber security 47
13.1 Network cyber security requirements 47
13.1.1 General 47
13.1.2 Cyber security management system 47
13.1.3 Operation plan design 48
13.1.4 16425-Network equipment access security 49
13.1.5 Wireless network access authentication method 50
13.1.6 Network design 51

Annex A (informative) **Implementing the content provided in this document 56**

Annex B (informative) **16425-Network nodes and network monitoring specifications 77**

Annex C (informative) **16425-Network implementation example 81**
