

ISO 16425:2024-01 (E)

Ships and marine technology - Specifications for the installation of ship communication networks for shipboard equipment and systems

Contents		Page
Foreword		vi
Introduction		viii
1 Scope		1
2 Normative references		1
3 Terms and definitions		2
4 Abbreviated terms		6
5 Network system architecture		7
5.1 Scope of networks system architecture.....		7
5.2 Controlled network requirements.....		9
5.3 Network system design.....		9
5.3.1 General.....		9
5.3.2 Network system separation.....		10
5.3.3 Network division.....		10
5.3.4 Traffic division.....		10
5.3.5 Redundancy.....		11
5.3.6 Cyber security.....		11
5.4 Roles and management.....		11
5.4.1 General.....		11
5.4.2 Ship owner.....		11
5.4.3 System integrator.....		11
5.4.4 Ship operator.....		11
5.4.5 Manufacturer.....		12
5.4.6 After-sales-service provider.....		12
6 Organized necessary function		12
6.1 General.....		12
6.2 Necessary information.....		12
7 Operation plan design		13
7.1 General.....		13
7.2 Objectives for managing shipboard network operations.....		13
7.3 Items to manage.....		15
7.3.1 Items to manage devices and cables to be installed.....		15
7.3.2 Items to monitor and details.....		15
7.3.3 Details of maintenance.....		15
7.3.4 Back-ups and log management.....		15
7.3.5 Operation of reports.....		15
7.3.6 Service management.....		16
8 Understanding the equipment to be installed		16
8.1 Understanding the equipment.....		16
8.1.1 General.....		16
8.1.2 Inventory lists.....		16
8.2 Requirements for the 16425-Network device and 16425-equipment installed in the shipboard network.....		16
8.2.1 General cyber security requirements for 16425-Network devices and 16425-equipment.....		16
8.2.2 Network interface for 16425-Network equipment and 16425-Network device.....		17
8.2.3 Requirements for 16425-Network nodes.....		17
8.2.4 Requirements for 16425-Network devices.....		18

8.3	Protocol and traffic	23
8.3.1	General	23
8.3.2	Protocol	23
8.3.3	Traffic	23
8.3.4	IP address	23
8.3.5	MAC address	23
8.4	Cable	23
8.4.1	General	23
8.4.2	Cable specification	23
8.4.3	Cable earth method	23
9	Network design	24
9.1	General	24
9.2	Concept of shipboard network system	24
9.2.1	General arrangement	24
9.2.2	Channel	24
9.2.3	Permanent ink	24
9.2.4	Code	25
9.2.5	Extender connector	25
9.2.6	Telecommunications outlet	25
9.3	Design standard	25
9.3.1	Category of cables and codes	25
9.3.2	Plug connection method	25
9.3.3	Specifications for naming cable	25
9.3.4	Model number of cable, code, plug, jack and crimping tools to be used	25
9.4	Physical design	25
9.4.1	Selection of 16425-Network equipment	25
9.4.2	Cabling	27
9.4.3	Separation of collision domain	28
9.4.4	Setting of interfaces	28
9.4.5	Installation	28
9.5	Logical design	28
9.5.1	General	28
9.5.2	Isolation of network	28
9.5.3	Broadcast domain	29
9.6	Reliability design	29
9.6.1	General	29
9.6.2	Redundancy	29
9.6.3	Monitoring of shipboard networks	29
9.6.4	Load design	30
9.7	Wireless network design	30
9.7.1	General	30
9.7.2	Frequency requirement	30
9.7.3	Frequency interference	30
9.7.4	Load design	31
9.7.5	Installation design	31
9.7.6	Wireless network security design	31
9.7.7	Power supply and voltage	31
9.7.8	Pre-survey	31
9.7.9	Security design	32
9.8	Documentation	32
9.8.1	Network design document	32
9.8.2	List of equipment (device inventory)	32
9.8.3	Schematic diagram	32
9.8.4	Logical topology diagram	33
9.8.5	List of virtual networks	33
9.8.6	List of interfaces between (virtual) networks	33
9.9	Risk assessment (design phase)	33
10	16425-Network device and cable installation	33
10.1	General	33
10.2	Installation procedure	34
10.2.1	16425-Network device	34
10.2.2	Network cable	34
10.2.3	Cable end termination	36

10.3	Installation confirmation.....	37
10.3.1	Conductivity confirmation.....	37
10.3.2	Wire map confirmation.....	37
10.3.3	Length confirmation.....	37
10.3.4	Insertion loss test.....	37
10.3.5	Near end crosstalk loss.....	37
10.3.6	Power meter checking.....	38
10.3.7	Cable ID.....	38
10.3.8	End termination.....	38
10.4	16425-Wireless-Gateway installation procedures.....	38
10.4.1	Environmental resistance.....	38
11	Network cable installation and wireless installation test and inspection.....	38
11.1	Cable installation.....	38
11.2	16425-Wireless Gateway installation confirmation.....	44
12	Network operation.....	45
12.1	General.....	45
12.2	Identify vulnerabilities.....	45
12.2.1	Operation policy and procedure.....	45
12.2.2	Inventory and assessment.....	45
12.3	Develop protection and detection measures.....	46
12.3.1	Policy and procedure.....	46
12.3.2	Access control.....	46
12.4	Response and recovery.....	46
12.4.1	Contingency plan.....	46
12.4.2	Response to shipboard network incidents.....	46
12.4.3	Recovery from shipboard network incidents.....	46
12.5	Maintenance.....	47
12.5.1	Maintenance policy and procedure.....	47
12.5.2	Maintenance document and report.....	47
13	Network cyber security.....	47
13.1	Network cyber security requirements.....	47
13.1.1	General.....	47
13.1.2	Cyber security management system.....	47
13.1.3	Operation plan design.....	48
13.1.4	16425-Network equipment access security.....	49
13.1.5	Wireless network access authentication method.....	50
13.1.6	Network design.....	51
	Annex A (informative) Implementing the content provided in this document.....	56
	Annex B (informative) 16425-Network nodes and network monitoring specifications.....	77
	Annex C (informative) 16425-Network implementation example.....	81
	Bibliography.....	83
