ISO 8933-2:2024-08 (E)

Ships and marine technology - Energy efficiency - Part 2: Energy efficiency of maritime functional systems

Contents

Page

Foreword vi

Introduction vii

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols and abbreviated terms 2

5 Methods to evaluate the energy efficiency of maritime functional systems 3

6 Pressure and flow functional systems 4
6.1 General 4
6.2 Ballast water management system 5
6.2.1 General 5
6.2.2 Ultraviolet treatment systems 6
6.2.3 Electro-chlorination treatment systems 8
6.3 Freshwater generator 10
6.3.1 General 10
6.3.2 Definition of input and output 11
6.3.3 Definitions of boundaries and media 11
6.3.4 Calculation method 11
6.3.5 Measuring method 13
6.3.6 Example of measuring and calculations 14
6.4 Seawater cooling system 15
6.4.1 General 15
6.4.2 Definition of input and output 15
6.4.3 Definitions of boundaries and media 15
6.4.4 Calculation method 16
6.4.5 Measuring method 17
6.4.6 Example of measuring and calculation 17
6.5 Freshwater cooling system 18
6.5.1 General 18
6.5.2 Definition of input and output 18
6.5.3 Definitions of boundaries and media 18
6.5.4 Calculation method 19
6.5.5 Measuring method 20
6.5.6 Example of measuring and calculation 20
6.6 Engine lube oil system 21
6.6.1 General 21
6.6.2 Definition of input and output 21
6.6.3 Definitions of boundaries and media 21
6.6.4 Calculation method 22
6.6.5 Measuring method 23
6.6.6 Example of measuring and calculation 24
6.7 Steam boiler system, thermal fluid system and hot water system 24
6.7.1 General 24
6.7.2 Definition of input and output 25

6.7.3 Definitions of boundaries and media 25
6.7.4 Calculation method 26
6.7.5 Measuring method 27
6.7.6 Example of measuring and calculation 28
6.8 Cargo pump system 29
6.8.1 General 29
6.8.2 Definition of input and output 29
6.8.3 Definitions of boundaries and media 29
6.8.4 Calculation method 30
6.8.5 Measuring method 31
6.8.6 Example of measuring and calculation 31
6.9 Cargo heating system 32
6.9.1 General 32
6.9.2 Definition of input and output 32
6.9.3 Definitions of boundaries and media 32
6.9.4 Calculation method 33
6.9.5 Measuring method 34
6.9.6 Example of measuring and calculation 34
6.10 Volatile organic compound recovery system 34
6.10.1 General 34
6.10.2 Definition of input and output 34
6.10.3 Definitions of boundaries and media 35
6.10.4 Calculation method 35
6.10.5 Measuring method 36
6.10.6 Example of measuring and calculation 37
6.11 Separator system 37
6.11.1 General 37
6.11.2 Definition of input and output 38
6.11.3 Definition of boundaries and media 38
6.11.4 Calculation method 38

7 Lighting systems 39
7.1 General 39
7.2 Lighting of internal spaces 39
7.2.1 General 39
7.2.2 Definition of input and output 40
7.2.3 Definitions of boundaries and media 40
7.2.4 Calculation method 40
7.2.5 Measuring method 40
7.2.6 Example of measuring and calculation 42

8 Heating/cooling functional systems 43
8.1 General 43
8.2 Air-conditioning system with compressor 43
8.2.1 General 43
8.2.2 Definition of input and output 43
8.2.3 Definitions of boundaries and media 44
8.2.4 Calculation method 46
8.2.5 Measurement method 47
8.2.6 Example of measuring and calculation 48
8.3 Air-conditioning system without compressor 48
8.3.1 General 48
8.3.2 Definition of input and output 48
8.3.3 Definitions of boundaries and media 49
8.3.4 Calculation method 50
8.3.5 Measurement method 50
8.3.6 Example of measuring and calculation 51
8.4 Absorption chiller system 52
8.4.1 General 52
8.4.2 Definition of input and output 52
8.4.3 Definitions of boundaries and media 52

8.4.4 Calculation method 53
8.4.5 Measuring method 54
8.4.6 Example of measuring and calculation 54
8.5 Compression-type water chilling system 55
8.5.1 General 55
8.5.2 Definition of input and output 55
8.5.3 Definitions of boundaries and media 55
8.5.4 Calculation method 57
8.5.5 Measuring method 58
8.5.6 Example of measuring and calculation 58

9 Mechanical functional systems 59
9.1 General 59
9.2 Propulsion shafting system 59
9.2.1 General 59
9.2.2 Definition of input and output 59
9.2.3 Definitions of boundaries and media 59
9.2.4 Calculation method 60
9.2.5 Measuring method 61
9.3 Deck crane system 62
9.3.1 General 62
9.3.2 Definition of input and output 62
9.3.3 Definitions of boundaries and media 62
9.3.4 Calculation method 63
9.3.5 Measuring method 66
9.4 Ship anchor and mooring winch system 67
9.4.1 General 67
9.4.2 Definition of input and output 67
9.4.3 Definitions of boundaries and media 67
9.4.4 Calculation method 68
9.4.5 Measuring method 69
9.5 Steering gear system 70
9.5.1 General 70
9.5.2 Definition of input and output 70
9.5.3 Definitions of boundaries and media 71
9.5.4 Calculation method 71
9.5.5 Measuring method 72

10 Propulsion functional systems 73
10.1 General 73
10.2 Solar photovoltaic system 74
10.2.1 General 74
10.2.2 Definition of input and output 74
10.2.3 Definitions of boundaries and media 74
10.2.4 Calculation method 74
10.2.5 Measuring method 76
10.3 Wind propulsion system 77
10.3.1 General 77
10.3.2 Definition of input and output 77
10.3.3 Definitions of boundaries and media 77
10.3.4 Calculation method 77
10.3.5 Measuring method 78
10.4 Fuel cell system 78
10.4.1 General 78
10.4.2 Definition of input and output 79
10.4.3 Definitions of boundaries and media 79
10.4.4 Calculation method 81
10.4.5 Measuring method 83
10.4.6 Example of calculation 83
10.5 Waste heat recovery system 84
10.5.1 General 84

10.5.2 Definition of input and output 84
10.5.3 Definitions of boundaries and media 84
10.5.4 Calculation method 84
10.5.5 Measuring method 85
10.5.6 Example of measuring and calculation 85
