ISO 20679:2025-01 (E)

Ships and marine technology - Marine environment protection - Testing of ship biofouling in-water cleaning systems

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Fundamental information needed for testing of IWC systems 3
4.1 Factors that can impact performance 3
4.2 Fundamental parameters 4

5 Test experimental design 6
5.1 General 6
5.2 Classification of IWC system application for testing 8
5.3 Duration and extent of testing 9
5.3.1 General 9
5.3.2 Proactive systems 9
5.3.3 Reactive systems 9

6 Quantificationofbiofoulingremovalandprevention 10
6.1 IWC systems 10
6.1.1 General 10
6.1.2 Proactive systems 10
6.1.3 Reactive systems 10
6.2 Fouling rating 10
6.3 Control and treated test locations 11
6.4 Biofouling survey sampling methods 12
6.4.1 General 12
6.4.2 Hull areas 12
6.4.3 Niche areas 13
6.4.4 Hull and niche areas 14
6.4.5 Proactive systems 14
6.5 Dive survey sampling method during low visibility 16
6.5.1 Hull areas 16
6.5.2 Niche areas 16
6.6 Environmental characteristics to quantify 17

7 Quantificationofchangestowaterquality 17
7.1 Water quality measures as proxies for broad environmental impacts 17
7.1.1 General 17
7.1.2 Proactive systems 17
7.1.3 Reactive systems 17
7.2 Water quality parameters to quantify 17
7.3 Water quality sample collection 19
7.4 Environmental characterization 21

8 Quantificationofdebrisprocessingandeffluent 21
8.1 Overview 21

8.2 Sampling the debris processing unit 22
8.3 Water quality parameters to quantify 23
8.4 Solid waste disposal 24

9 QuantificationofIWCimpactonshipcoatings 24

10 Data management 24
10.1 System for data management 24
10.1.1 General 24
10.1.2 Data quality objectives 25
10.1.3 Data quality indicators 25

10.2 Data recording and archiving 25
10.3 Data analysis 25
10.3.1 Overview 25
10.3.2 Quality assurance and quality control 26
10.3.3 Measurement uncertainty 26

11 Quality assessments 26
11.1 Fundamental principles 26
11.2 Technical audits 27
11.2.1 Overview 27
11.2.2 Technical system audit 27
11.2.3 Audit of data quality 27
11.3 Data quality assessment 27
11.4 Non-conforming work and corrective action 28
11.5 Audit reporting 28

12 Human health and environmental safety 28

13 Test report 29

Annex A (informative) Example of biofouling surveys of various surface types 30

Annex B (informative) Optional method for additional determinations of IWC impacts on ship coatings 31

Bibliography 33
