| European foreword ..... |   | 3           |
| Introduction .....      |   | 4           |
| 1                       | Scope .....                                 | 5           |
| 2                       | Normative references .....                  | 5           |
| 3                       | Terms and definitions .....                 | 5           |
| 4                       | Safety requirements .....                   | 6           |
| 4.1                     | Design .....                                | 6           |
| 4.1.1                   | General .....                               | 6           |
| 4.1.2                   | Buoyancy body .....                         | 6           |
| 4.1.3                   | Top material .....                          | 6           |
| 4.1.4                   | Grab line .....                             | 6           |
| 4.1.5                   | Reflective strips .....                     | 6           |
| 4.1.6                   | Colour .....                                | 6           |
| 4.2                     | Dimensions .....                            | 6           |
| 4.3                     | Buoyancy .....                              | 7           |
| 4.4                     | Mass .....                                  | 7           |
| 4.5                     | Strength .....                              | 7           |
| 4.6                     | Resistance .....                            | 7           |
| 4.7                     | Burning behaviour .....                     | 8           |
| 4.8                     | Temperature ranges for serviceability ..... | 8           |
| 5                       | Testing .....                               | 8           |
| 5.1                     | General .....                               | 8           |
| 5.1.1                   | Scope and sequence of testing .....         | 8           |
| 5.1.2                   | Manufacturer's certificates .....           | 8           |
| 5.1.3                   | Testing body .....                          | 8           |
| 5.2                     | Dimensions, mass, design .....              | 8           |
| 5.3                     | Temperature tests .....                     | 8           |
| 5.4                     | Fire test .....                             | 9           |
| 5.5                     | Drop test .....                             | 9           |
| 5.5.1                   | Free fall into water .....                  | 9           |
| 5.5.2                   | Free fall onto concrete floor .....         | 9           |
| 5.6                     | Strength .....                              | 9           |
| 5.7                     | Load-carrying capacity .....                | 9           |
| 5.8                     | Resistance .....                            | 9           |
| 5.8.1                   | Resistance to seawater .....                | 9           |
| 5.8.2                   | Resistance to diesel fuel .....             | 9           |
| 6                       | Designation .....                           | 10          |
| 7                       | Marking .....                               | 10          |
| Bibliography .....      |   | 11          |
