

ISO 15849:2001-11 (E)

Ships and marine technology - Guidelines for implementation of a fleet management system network

Contents		Page
1	Scope	1
2	Terms and definitions	1
3	Abbreviated terms	3
4	FMS network architecture	3
4.1	General architecture	3
4.2	Network design	4
4.3	Network management	4
4.4	Network security	5
4.5	Encryption	5
4.6	Database model	5
4.7	Database management system (DBMS)	5
5	Shipboard information technology platform (SITP)	6
5.1	Introduction	6
5.2	The SITP data acquisition service	6
5.3	SITP executive services	7
5.4	Communications services	10
5.5	SITP underlying system service	11
6	Land-based information technology platform (LITP)	12
6.1	General	12
6.2	Data acquisition services	12
6.3	Executive services	12
6.4	Communications manager	12
6.5	Configuration manager	12
7	Application program interfaces (APIs)	12
7.1	Introduction	12
7.2	Overview of APIs	12
7.3	API applications	13
7.4	API levels of implementation	13
8	System hardware	14
8.1	System hardware	14
8.2	Communications bus	14
9	Fault tolerance	14
9.1	Fault tolerance	14
9.2	Robustness	14
10	Demonstration and validation	15
10.1	General	15
10.2	Test philosophy	15
10.3	System hardware test	15
10.4	LAN software assessment	15
10.5	Tests and trials	15
11	Quality plan	16

11.1	General	16
11.2	Design and testing of the computer services	16
12	Operation and maintenance	17
13	Human interface	17
13.1	General	17
13.2	Visual display unit (VDU)	17
13.3	Screen image paging	17
14	Training and documentation	17
14.1	General	17
14.2	Documentation	18
	Bibliography	19
